Primary activities

T&W Medical A/S (TWM) is a private holding and investment company jointly owned by the Tøpholm and Westermann families. The collaboration between the families began in 1956 with the founding of hearing aid company Tøpholm & Westermann, later known as Widex. TWM owns and invests in high technology companies within medtech and life science that improve the quality of life for millions of people with health challenges such as hearing loss and epilepsy, including WS Audiology Group (WSA), T&W Holding (TWH), UNEEG™ medical, T&W Engineering (TWE) and other group companies.

- **WSA** is a global leader in the hearing aid industry with 12,500 employees designing, manufacturing and selling hearing aids and associated products globally through own sales companies and independent distributors. The WSA group delivered organic revenue growth of 7% to DKK 18,356 million and lifted reported EBITDA by 14% to DKK 3,574 million in 2022/23. The progress was driven by broad-based volume growth, improved revenue, efficiency measures and lower normalizations.
- TWH is the main investment company of the Tøpholm and Westermann families, focused on equity investments in listed and unlisted companies, investments in private equity, properties, infrastructure projects and alternatives as well as other asset classes and lending to related parties. TWH generated solid underlying investment performance in 2022/23, albeit profit before tax declined to DKK 143 million primarily due to foreign currency translation losses of DKK 128 million relating mainly to USD denominated private equity investments.
- **UNEEG™ medical** medical develops innovative and cognitive technologies that collect, monitor and analyze brain activity, focusing on the commercialisation of active implantable devices and other EEG-/neurological medical solutions. In 2022/23, UNEEG™ medical reported a loss before tax of DKK 181 million after continuing pre-commercialization efforts, continued investments in R&D and conducting clinical trials in the US and Europe.
- **TWE** develops EEG-based measurement technology and methods relevant to epilepsy and diabetes patients, among others. In 2022/23, TWE continued to support UNEEG™ medical with research and development work related to the measuring of long-term EEG and its varied use.

Financial review

TWM grew total revenue by 5% to DKK 18,371 million in fiscal year 2022/23 driven by progress in WSA, which generated 7% organic growth based on good traction in both the wholesale and consumer-facing businesses as sales picked up in the last part of the fiscal year after a slow start to the period.

Gross profit grew to DKK 10,734 million corresponding to a 58% gross margin, which was positively impacted by scale effects in WSA and cost savings from transformation projects but challenged by higher freight cost and business mix. Total investments in research and development across the TWM group amounted to DKK 1,468 million of which DKK 953 million were expensed. WSA, UNEEG™ medical and TWE continued to invest in innovation, pursuing development projects and strengthening the future product portfolio.

One-time costs and gains incurred are normalized and excluded from reported EBITDA if they are unusual or non-recurring in nature. In the financial year 2022/23, total normalization items decreased to DKK 253 million from DKK 595 million in fiscal year 2021/22. This development was mainly due to lower cost related to post-merger activities in WSA with 2022/23 being the last year with such activities.

EBITDA increased by 13% to DKK 3,384 million for an EBITDA margin of 18.4% lifted by improved revenue and efficiency measures in WSA as well as the decline in normalizations.

Normalized EBITDA increased to DKK 3,637 million corresponding to a Normalized EBITDA margin of 19.8%.

In fiscal year 2022/23, TWM's operating profit (EBIT) increased to DKK 1,073 million for an EBIT margin of 5.8% from DKK 524 million in the previous fiscal year driven mainly by higher earnings in WSA.

TWM's consolidated net financial items declined significantly to DKK -1,165 million in fiscal year 2022/23 from DKK -2,343 million in 2021/22. The development was affected by an increase in interest expenses to DKK 2,588 million, which was more than compensated by a combination of significantly higher interest income of DKK 824 million and foreign currency translation gains of DKK 589 million relating mainly to the ownership of WSA against foreign currency translation losses of DKK 1,385 million in the previous fiscal year. Details on net financial items are specified in note 4.4.

The result before tax was negative by DKK 92 million in 2022/23 against a negative result of DKK 1,820 million in 2021/22. Tax for the fiscal year 2022/23 amounted to DKK -172 million resulting in a net loss of DKK 264 million. The 2022/23 results are considered satisfactory and overall in line with the expectations set out in the annual report for 2021/22.

Outlook

WSA expects 7-10% organic revenue growth driven by core markets (US, France and Germany) supported by the launch of Signia IX and continued growth in fast growing markets, US Managed Care and Online. WSA's reported EBITDA margin is expected to increase by 1-2%-pts versus FY 2022/23, supported by revenue growth and cost improvement initiatives.

The outlook for the investment activities in TWH is subject to significant uncertainty as financial markets volatility persists. On this background, TWH is expected to generate a profit before tax of DKK 100-300 million depending on developments in financial markets in 2023/24.

UNEEG medical and TWE will continue to invest in research, development, clinical trials, organisational expansion and commercialisation, and the activities (combined) are expected to generate a loss before tax of DKK 150-250 million in 2023/24.

Risk management

The ownership of WSA constitutes the primary activity in TWM, and the risk management framework and efforts of WSA are therefore considered material and presented below, supplemented by comments about topics deemed relevant to TWM.

Risk management is a key part of effective management and internal control, and internal control systems have been implemented to provide a framework for all processes and activities designed to give reasonable assurance regarding the achievement of business objectives. Such systems are designed to manage, rather than eliminate, the risk of failure. Assurance activities monitor the efficiency and effectiveness of policies and operations and the status of compliance with statutory obligations. These can cover the effectiveness of internal controls over a broad range of areas such as strategic, operations, financial and compliance.

Financial risks

TWM is exposed to various financial market risks in a volatile macroeconomic environment affected by inflationary pressure and geopolitical risks stemming from international conflicts. These risks derive from fluctuations across various asset classes – including listed equities, private equity, bonds etc. – to which TWH is exposed, and foreign currencies due to the group's international operations and WSA's specific exposure to interest rate fluctuations as a result of floating rate loans. Approximately 2/3 of WSA sales is nominated in other currencies than the company's reporting currency. WSA's main currencies exposures are USD, SGD and JPY. WSA is primarily exposed to increasing supply chain cost / manufacturing cost nominated in USD and SGD as well as local sales exposure where cost and income are nominated in local currencies. WSA's funding structure as set up at the time of the merger, is exposed to volatile financial markets. WSA's long-term facilities are nominated in USD and EUR. Fluctuations in exchange rates and interest rates may adversely impact WSA and TWM earnings, thereby affecting the value of assets. Refer to note 4.2, 4.3 and 4.4 in the Financial Statements.

WSA has implemented efficient treasury policies for assessing the group's interest rate and currencies risks. A significant portion of the interest rate risk is hedged through the use of interest rate swaps to convert floating interest rate to fixed interest rate (90% until Q1 FY2023/24 and 50% until Q1 FY2024/25). The risk is constantly monitored to alleviate the impact of rising interest rates. Moreover, WSA hedged 40-90% of rolling 12 months net currency exposure through 3-12 months' foreign exchange forward contracts managed by the Group treasury function to alleviate the impact of adverse currency effects on earnings.

Cybersecurity

WSA's global operations and services are dependent on multiple IT systems, services, and underlying infrastructure. This carries a risk of system errors, data breaches, unauthorized access to data and systems, denial of services attacks, ransomware attacks, and other disruptions of IT services impacting WSA Group operations.

Minor digital risk events, such as viruses, phishing, and break-in attempts do not have any substantial material impact on WSA's business. Major cyberattacks, however, such as ransomware or data breaches might have a substantial negative financial impact on WSA due to reputation loss, regulatory fines as well as disruption of internal operations and services provided to customers.

WSA regularly reviews the company's cybersecurity posture and tracks the progress of its maturity. The strategy includes prevention, mitigation, and response to cybersecurity events. WSA's Information Security Management System is ISO27001 certified as of 2023. The company recurrently upgrades defence, response, and disaster recovery processes and tools to minimize the potential impact of cybersecurity events. WSA carries out ongoing, global security communication and training on secure behaviour in the workplace.

Supply chain bottleneck and inflation

WSA's global manufacturing sites are located in Singapore and Denmark with significant regional operational hubs in Philippines, China, Poland and Mexico. Stable performance in deliveries and quality of manufacturing and suppliers is key to ensuring strong business development. Any supply chain disruption may lead to shortages affecting on-time customer deliveries, impacting business objectives and may entail quality issues, limited production output and delayed deliveries or unsatisfactory service to customers. Moreover, supply disruption and cost increases may have an impact on the company's earnings.

WSA engages closely with critical suppliers, conducts audits and identifies alternative sourcing options to reduce the risk of material shortages and ensure a satisfactory quality and service level. WSA's stock levels are designed based on supplier and component assessments to ensure continuous supply, and the group works with multiple freight forwarders to ensure available capacity and on-time deliveries.

Product development

As a leading player in the hearing aid markets, investment in product development and R&D initiatives plays a vital role in WSA's strategy and is essential as product differentiator and supportive to the group's market position. In a technology and product-driven market, WSA's knowledge and trade secrets are key to maintaining the cutting edge and to compete effectively with other companies in the market. There is a risk that WSA's intellectual property and property development is unsuccessful in patenting with adverse impact on earnings.

WSA obtains patent protection in key jurisdictions for patentable subject matter in the proprietary devices. The group furthermore reviews third party patents and patent applications to develop an effective patent strategy, avoid infringement of third-party patents, identify licensing opportunities, and monitor patent claims of others.

Quality and regulatory

As medical device company, WSA cares deeply about the quality and safety of its hearing aids and other devices. WSA knows that the company's products can make a positive difference in the lives of its customers and thus always strives to avoid any errors that could harm them. WSA operates in a dynamic and regulated market, where the company complies with all the relevant medical product regulations that apply to its products and services. WSA follows the best practices in the development, testing, manufacturing, labelling, premarket clearance, approval, marketing, export and import of its products. The company is pro-actively managing latest regulatory changes, such as adoptions of Medical Device Regulations (MDR) in Europe, OTC rules by the USA FDA or revisions of other relevant regulations in markets where WSA is active or plans to become active. With WSA's advanced vigilance system and teams, the company is ready to adapt to these changes and continue to provide high-quality products to its customers.

WSA embraces regulatory changes and adapts to them quickly. The company is confident that it can meet the requirements for coverage and access to national health insurances providing their patients highest quality and service. WSA was prepared to obtain FDA premarket approvals (510k) for its products and will continue to do so, as WSA always follows the highest standards of quality and safety.

WSA manages a multi-site Quality Management System (QMS) certified under ISO 13485 following the European Medical Device Regulation (MDR EU 2017/745) and the US FDA Quality System Regulation (QSR). This allows WSA to achieve global excellence and local relevance in quality management across the group. WSA keeps its multi-site QMS up to date with the latest business and regulatory demands, such as expanding to the company's sites in Mexico. Moreover, WSA's manufacturing and development sites in China, Denmark, Germany, the US, and Singapore have all aced the US Food and Drug Administration (FDA) audit inspections since 2018. WSA always stays on top of regulatory changes and continues to work closely with regulators and Notified Bodies and adapt the company's management systems, quality organization and manufacturing setup accordingly.

Sustainability

WSA is committed to sustainability. In our own operations and upstream and downstream value chain, through our products and services, as well as through our business relationships, lies the risks of negative impacts on people or the environment. On the other hand, certain sustainability matters could trigger material financial effects on WSA, which is also considered as sustainability risk.

Through materiality assessment, we have identified the 14 material topics that have potential impacts. Read more on ESG Statement on page 131 in the Annual Report 2022/23 for WSA, which can be found on WSA's website.

To mitigate the impact and risks, and capture opportunities that are entailed in the 14 material topics, WSA drives sustainability programs, with KPIs and targets tied to our management team, managers and eventually cascaded to all employees' performance objectives. We closely monitor the progress of each program and keep the dialogue with the relevant stakeholders. Read more on ESG Statement on page 131 in the Annual Report 2022/23 for WSA, which can be found on WSA's website.

Tax

TWM group companies invest and conduct business globally and are therefore subject to complex tax regimes with different tax rules and rates. This jurisdictional complexity entails risks of TWM group companies being subject to double taxation and loss of tax deductibility of costs incurred.

To avoid double taxation and ensure sound compliance with legislative requirements, TWM group companies cooperate with tax authorities to establish clear and unambiguous distribution of income between tax regimes. Significant resources are spent on ensuring compliance, and the efforts to ensure transparency and clarity regarding tax payments include obtaining advance rulings from and entering into Advance Pricing Arrangements with tax authorities as well as seeking expert advice from specialized tax consultants.

Statutory report on corporate social responsibility

This report constitutes the consolidated statements on corporate social responsibility, gender diversity and data ethics 2022/23, cf. the Danish Financial Statements Act sec. 99a, 99b and 99d for T&W Medical A/S.

Business model

T&W Medical A/S (TWM) is the holding company for the Tøpholm and Westermann families' ownership in WS Audiology Group (WSA), T&W Holding (TWH), UNEEG medical, T&W Engineering (TWE) and other group companies. For a more detailed description of the business model of WSA, which constitutes the primary activity in TWM, please refer to the Annual Report 2022/23 for the company, which can be found here:

https://azurecdn.wsa.com/2024/01/WSA_AR-2022-23_final_web.pdf

CSR risk evaluation and mitigation

The principal CSR risks in the TWM group in terms of human rights, environment and climate protection, social and employee matters and anti-corruption are mainly related to the activities in WSA. The risk evaluation and mitigation procedures are described in WSA's Annual Report 2022/23 to which reference is made above.

TWM Group – policies and activities

TWM has not introduced separate group CSR policies for its subsidiaries or financial investments at this point, since this has not been considered necessary considering the scope of the investment activities.

However, TWM supports the 10 principles of the UN Global Compact through WSA's membership of the UN Global Compact and the group's incorporation of the principles into the strategies, policies and procedures, covering human rights, environment and climate protection, social and employee matters and anti-corruption. In July 2022, WSA furthermore submitted science-based climate targets in line with limiting the global temperature rise to 1,5° C. WSA committed to:

- Reduce absolute scope 1 and 2 GHG emissions 50% by 2030 from a 2020 base year.
- Increase annual sourcing of renewable electricity from 16% in 2020 to 100% by 2025 and continue sourcing 100% renewable electricity through 2030.
- Reduce absolute scope 3 GHG emissions 30% by 2030 from a 2021 base year.

TWM follows the development in WSA through its active ownership and board participation. Reference is made to pages 131-164 in WSA's Annual Report 2022/23, which presents CSR performance data and meet the requirements of the UN Global Compact Communication on Progress Policy.

The activities of TWH includes significant investments in energy infrastructure projects with a particular focus on renewables and greenfield projects. These investments contribute to the green energy transition and comprise newly constructed energy capacity such as solar plants and wind turbines.

Real estate investments include the ownership of the building in Lynge, which serves as a shared headquarter and manufacturing site for WSA as well as the headquarter for T&W Medical A/S and T&W Holding A/S. The building is CO₂ neutral with several functions focused on saving energy and ensuring a minimum exploitation of natural resources, including rainwater collection and use, production waste heat reused for water heating, etc. Electricity for the building and production facility is produced by the group's own wind turbine and solar cells installed on the building. When the production of

TWM gender diversity

For the Family Office, the gender split is 60% women and 40% men (excluding family members) with 40% women and 60% men in managerial positions.

The board of directors of TWM currently consists of six members. At present, there are no female board members as the board consists solely of family owners. The gender target is that the share of women should be minimum 2 members. Until now, no candidates have been identified. The board composition has been reviewed in 2022/23 and will continue to be so on an ongoing basis to pursue the ambition.

Data ethics statement

TWM is a holding company, which uses and processes a very limited amount of data. On that background, TWM complies with applicable legislation without having established a policy on data ethics.

WSA constitutes the primary activity in TWM and has a policy on data ethics that serves as a framework for the ethical management of data within the WSA group. WSA hereby supplements its general commitment to integrity and compliance – not only in relation to personal data but in relation to any kind of data processed by WSA. The data ethics policy applies globally, and it is mandatory for management and employees in the WSA group to comply with the policy.

- 5.12 Approval of the consolidated financial statements

1 Basis for preparation

The consolidated financial statements for the Group and separate parent financial statements for T&W Medical A/S have been prepared in accordance with IFRS as adopted by the European Union (EU) and further requirements in the Danish Financial Statements Act (Large C).

The consolidated financial statements and separate parent financial statements are presented in Danish Kroner (DKK) which is the functional currency of T&W Medical A/S. All values are rounded to the nearest million (DKK), except where indicated otherwise.

The Group's general accounting policies are described in section 1.1 General accounting policies below. In addition to this, specific accounting policies are described in each of the individual notes to the consolidated financial statements. The accounting policies set out below and in each note have been used consistently in respect of the financial year and the comparative figures.

1.1 General accounting policies

Basis of consolidation

The consolidated financial statements comprise the financial statements of T&W Medical A/S (the parent company) and subsidiaries, which are entities controlled by T&W Medical A/S, prepared in accordance with Group policies. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are listed in note 5.10.

The consolidated financial statements are prepared by combining items of a uniform nature and subsequently eliminating intercompany transactions, internal shareholdings and balances and unrealized intercompany gains or losses. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences and until the date on which control ceases.

The accounting items of subsidiaries are recognised 100% in the consolidated financial statements. Non-controlling interest's share of subsidiaries' profit or loss for the year and of equity are included in the Group's profit or loss and equity, but are disclosed separately.

Acquisitions or disposals on non-controlling interests in subsidiaries, which does not result in obtaining or losing control of such subsidiaries, are treated as an equity transaction in the consolidated financial statements, and any difference between the consideration and the carrying amount of the non-controlling interest is allocated to the Parent's share of the equity.

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, as well as any related non-controlling interests and other components of equity. Any interest retained in the former subsidiary is measured at fair value when control is lost. Any resulting gain or loss is recognised in profit or loss.

Translation of foreign currency

A functional currency is determined for each of the reporting entities in the Group. The functional currency is the primary currency used for the reporting entity's operations. Transactions denominated in other than the functional currency are translated into the functional currency at the exchange rates at the transaction date. Foreign exchange differences between the exchange rate at the transaction date and at the date of payment are recognised in other financials, net.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the transaction date.

Foreign exchange differences are generally recognised in other financials, net in the income statement. However, the following foreign exchange differences are recognised in other comprehensive income ("OCI"):

- Qualifying cash flow hedges to the extent that the hedges are effective
- Foreign exchange adjustment of balances with foreign entities that are considered part of the net investment in the entity

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into DKK, at the exchange rates at the reporting date. The income statements and statements of cash flows of foreign operations are translated into DKK at average exchange rates for the period, unless such average exchange rates are unrepresentative of the exchange rates prevailing at the transaction dates, in which case the transaction date exchange rates are applied.

Foreign exchange differences arising on translation of the opening balance of equity of foreign entities at the exchange rate at the reporting date and on translation of the income statement from the average exchange rate to the exchange

rate at the reporting date are recognised on other comprehensive income and attributed to a separate translation reserve in equity, except to the extent that the translation difference is allocated to non-controlling interests.

On complete or partial disposal of a foreign entity such that control, significant influence or joint control is lost, or on repayment of balances that constitute part of the net investment in the foreign entity, the share of the cumulative amount of the exchange differences recognised in other comprehensive income relating to that foreign entity is recognised in the income statement as part of the gain or loss on disposal. When the Group disposes of part of its interest in a subsidiary but retains control, the relevant portion of the cumulative amount is reattributed to non-controlling interest. On partial disposal of an associate or joint venture while retaining significant influence or joint control, the relevant portion of the cumulative amount is reclassified to the income statement.

Statement of cash flows

The cash flow statement shows cash flows from operating, investing and financing activities as well as cash and cash equivalents at the beginning and the end of the financial year.

Cash flows from operating activities are presented using the indirect method and calculated as the profit/(loss) for the period adjusted for non-cash operating items, changes in working capital and income taxes paid.

Cash flows from investing activities comprise payments in connection with acquisition and divestment of enterprises, activities and fixed asset investments as well as purchase, development, improvement and sale, etc. of intangible assets and property, plant and equipment. Cash flow from acquired enterprises is recognised in the cash flow statement from the acquisition date. Cash flow from disposed of enterprises is recognised up until the disposal date.

Cash flows from financing activities comprise changes in the size or composition of the contributed capital and related costs as well as the raising of loans, repayment of interest-bearing debt (principal and interest), acquisition and disposal of treasury shares and payment of dividends to shareholders.

Cash and cash equivalents comprise cash and short-term securities with an insignificant price risk.

Cash flows cannot be derived directly from the statement of financial position and income statement.

Applying materiality

The consolidated financial statements are a result of processing large numbers of transactions and aggregating those transactions into classes according to their nature or function. The transactions are presented in classes of similar items in the consolidated financial statements. If a line item is not individually material, it is aggregated with other items of a similar nature in the consolidated financial statements or in the notes.

There are substantial disclosure requirements throughout IFRS. Management provides specific disclosures required by IFRS unless the information is not applicable or considered immaterial to the economic decision-making of the users of these financial statements.

1.2 Significant accounting estimates and judgements

In preparation of the consolidated financial statements, Management makes various accounting estimates and judgements that form the basis of presentation, recognition and measurement of the Group's assets, liabilities, income and expenses. The key accounting estimates identified are those that have a significant risk of resulting in a material adjustment to the carrying amounts of assets or liabilities within the next financial year.

The application of the Group's accounting policies may require Management to make judgements that can have a significant effect on the amounts recognised in the consolidated financial statements. Management judgement is required in particular when assessing the substance of transactions that have a complicated structure or legal form.

The accounting estimates and judgements made are based on historical experience and other factors that Management assesses to be reliable, but that, by nature, are associated with uncertainty and unpredictability and may therefore prove incomplete or incorrect. Specific accounting estimates and judgements are described in each of the following individual notes to the consolidated financial statements:

Specific accounting estimates and judgements are described in each of the following individual notes to the consolidated financial statements:

Principal accounting policies	Key accounting	Nature of impact	Note	Estimation risk
Depreciation, amortization and impairment	Estimate of recoverable amount of goodwill	Estimate	3.3	High
Income tax and deferred income	Estimate of value of deferred tax assets Determination of possible outcomes of uncertain tax position	Estimate Judgement	2.3	Medium
Provisions	Estimate of warranty provisions Estimate of right of return provisions	Estimate Estimate	3.10	Medium
Business Combination	Estimates over the measurement of contingent consideration	Estimate	5.1	Medium

1.3 Adoption of new and amended IFRS

In the current year, the Group has applied the amendments to IFRS standards and Interpretations issued by the IASB and IFRSs endorsed by the European Union effective for annual periods beginning on or after 1 October 2022. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements. Furthermore, Management does not anticipate any significant impact on future periods from the adoption of these amendments.

Management has assessed the impact of new or amended accounting standards and interpretations (IFRSs) issued by the IASB that has not yet become effective. Management does not anticipate any significant impact on future periods from the adoption of these amendments.

2 Results of the year

2.1 Revenue

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
<i>Revenue by geographic region:</i>		
EMEA-LA	6.052	7.462
US	9.259	7.188
Asia-Pacific	3.060	2.843
Total	18.371	17.493

Revenue is predominantly recognized at a point in time, and revenue recognized over time is not significant. Revenues are attributed to countries on the basis of the customer's location. The Region "EMEA-LA-CA" consists of Europe, the Middle East, Africa, Canada and Latin-America. The Region "US" is the United States. The Region "Asia-Pacific" consists of Asia, Australia and the Pacific region.

Consolidated revenue mainly derives from sale of goods and is broken down by the selling entity. No individual customer accounts for 10% or more of the total revenue. The Group considers its operations to constitute one single operating segment.

Contract liabilities

The T&W Medical A/S Group has recognised the following liabilities related to contracts with customers:

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
Customer prepayments	104	104
Deferred revenue	238	272
Volume discounts	350	322
Right of returns	209	228
Contract liabilities with customers	901	926

Significant changes in the contract liabilities balances during the year are as follows:

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
Contract Liabilities		
Opening balances as at 1 October	926	820
Foreign currency translation adjustments	(40)	77
Revenue recognised that was included in the contract liability from prior year and current year balance	(320)	(395)
Advances received during the year	402	416
Others	(67)	8
Total	901	926

Accounting policies

Revenue from sale of products is recognised when the Group has transferred control of products sold to the buyer and it is probable that the Group will collect the consideration to which it is entitled for transferring the products. Control of the products is transferred at a point in time, typically on delivery.

Revenue is measured at the fair value of the consideration received or receivable net of discounts, VAT and other duties.

Contracts with customers sometimes include multiple promises that constitute separate performance obligations, and to which a portion of the transaction price needs to be allocated. The total transaction price in the contract is allocated to separate performance obligation based on the relative stand-alone selling prices of each such performance obligation. Each separate performance obligation is recognised when control is transferred to the customer.

When products are sold with a right of return, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. In such cases, the expected returns are estimated based on an analysis of historical experience adjusted for any known factors impacting expectations for future return rates. To the extent that the Group will be able to recover the cost of returned products, when the customers exercise their right to return, a separate right to returned products asset and a reduction in cost of sales is recognised.

Discounts, rebates and sales incentives to customers and extended warranties

The Group pays various discounts, rebates and sales incentives to customers including trade discounts and volume rebates. Furthermore, customer discounts include the difference between the present value and the nominal amount of loans to customers at below market interest rates, cf. Note 3.5 Customer loans.

Discounts, rebates, and sales incentives to customers are deducted from revenue and are measured using either the expected value method or the most likely amount method depending on which method better predicts the amount of consideration to which the Group will be entitled net of discounts, rebates and sales incentives.

Estimates of the number of returns of products under customers right of return are based on the right of return policies and practices, accumulated historical experience, sales trends and the timing of returns from the original transaction date when applicable. Where new products are sold or products are sold to new markets, for which sufficient historical experience does not exist, refund liability and revenue to be recognized are based on estimated demand and acceptance rate for well-established products with similar market characteristics. If such similar product or market characteristics do not exist, recognition of revenue is postponed until there is evidence of consumption of the products by the customer, or when the right of return has expired.

Discounts, rebates and sales incentives are estimated and accrued when the related revenue is recognized. To make such estimates require use of judgment, as all conditions are not known at the time of the sale, e.g. the number of units sold to a given customer or the expected utilization of loyalty programmes. Liabilities in respect of sales discounts, rebates and loyalty programmes are adjusted, as the Group gain better information on the likelihood that they will be realized and the value at which they are expected to be realized.

The accrual against revenue of discounts from issue of customer loans at off-market terms (cf. Note 3.5 Customer loans) is based on the customers total committed purchases of products throughout the term of the customer loan, and is recognized as a discount for each product sold.

Extended warranties

The Group offers customers the option to separately purchase extended warranties for inventories sold. The extended warranty is a distinct service to the customer. Under IFRS 15, the Group accounts for a service-type warranty as a separate performance obligation to which the Group allocates a portion of the transaction price when the warranty is bundled together with the sale of inventories. The portion of the transaction price allocated to the service-type warranty is initially recorded as a contract liability and recognized as revenue on a straight-line basis over the period the warranty services are provided. Revenue is recognized when the customer receives the warranty coverage and loss and damage as part of the purchase of the hearing aid.

The standard warranty period for hearing aids varies across territories, typically between 12 and 36 months. The extended warranty covers periods beyond the standard warranty period or standard warranty terms. Payment terms vary significantly across territories.

2.2 Staff costs

DKKm	1 October 2022 – 30 September 2023	1 October 2021 – 30 September 2022
Wages, salaries and remuneration	5.718	5.373
Statutory social welfare contributions and expenses for optional support	597	644
Expenses relating to pension plans and employee benefits	186	162
Total	6.500	6.179
Average number of full-time employees	12.682	12.111

For information regarding remuneration of the Board of Directors, Executive Board and other Key Management Personnel, please refer to note 5.2 Remuneration of Key Management Personnel.

Accounting policies

Wages, salaries, social security contributions, annual leave and sick leave, bonuses and non-monetary benefits are recognised in the year in which the associated services are rendered by employees of the Group. Where the Group provides long-term employee benefits, the costs are accrued to match the rendering of the services by the employees concerned.

2.3 Tax

Tax loss and credit carry-forward	590		860
Other	(118)	(22)	(48)
Total	228	(216)	(2.253)

The recognized tax loss carry-forward (gross amount) of DKK 986 million (2022: DKK 1.953 million) includes tax losses of DKK 15 million (2022: DKK 16 million) that can be carried forward for 1 to 30 years. The remaining tax loss have no expiry date.

The recognized interest carry-forward (gross-amount) of DKK 1.539 million (2022: DKK 1.450 million) can be carried forward indefinitely.

Unrecognized deferred tax assets

Unrecognized tax assets are based on the Managements expectation about the future taxable profits during the periods in which those temporary differences and tax loss carry forwards become deductible. Management considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, it is probable the Group will realize the benefits of these deductible differences.

Deferred tax assets have not been recognized with respect to the following items (gross amounts):

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
Receivables, provisions, liabilities, etc.	15	30
Tax loss carry forwards	834	924
Interest carry forwards	22	0
Total unrecognized tax carry forwards	849	954

Unrecognized deferred tax liabilities

The Group has not recognized deferred tax liabilities for income taxes or foreign withholding taxes on the cumulative earnings of subsidiaries of DKK 67 million (2022: DKK 139 million) because the earnings are intended to be permanently reinvested in the subsidiaries.

OECD Pillar Two model rules

The Group is within the scope of the OECD Pillar Two model rules. Pillar Two legislation was substantially enacted in Denmark and will come into effect from 1 January 2024. Under the legislation, the Group is liable to pay a top-up tax for the difference between its GloBE effective tax rate per jurisdiction and the 15% minimum rate. All entities within the group are expected to have an effective tax rate that exceeds 15%, except for one subsidiary that operates in Singapore. Since

the Pillar Two legislation was not effective at the reporting date, the Group has no related current tax exposure. The Group applies the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes, as provided in the amendments to IAS 12 issued in May 2023. The Group is in the process of assessing its exposure to the Pillar Two legislation for when it comes into effect.

Accounting policies

Income tax comprises current tax and changes in deferred tax for the year, including changes as a result of changes in tax rates. The tax expense for the year is recognised in profit or loss except to the extent that it relates to items recognised directly in other comprehensive income or directly in equity.

T&W Medical A/S is jointly taxed with all Danish subsidiaries. The current Danish corporation tax is allocated between the jointly taxed companies in proportion to their taxable income. The jointly taxed companies are taxed under the on-account tax scheme.

Current tax liabilities or assets are measured using the tax rates and tax laws that have been enacted or substantively enacted in each jurisdiction by the end of the reporting period.

Deferred tax is measured using the balance sheet liability method and comprises all temporary differences between the carrying amount and tax base of assets and liabilities. Deferred tax is not recognised for taxable or deductible temporary differences:

- arising from the initial recognition of goodwill
- on the initial recognition of assets and liabilities in a transaction that is not a business combination, and at the time of the transaction, affects neither accounting profit nor taxable profit
- associated with investments in subsidiaries, branches, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

If amortisation of goodwill is deductible for tax purposes, a deferred tax liability is recognised on temporary differences arising after initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantially enacted at the reporting date.

Deferred tax assets and tax liabilities are offset if the entity has a legally enforceable right to offset current tax liabilities and tax assets or intends either to settle current tax liabilities and tax assets or to realise the assets and settle the liabilities simultaneously.

Significant judgements and accounting estimates

The T&W Medical A/S Group operates in a large number of tax jurisdictions where tax legislation can be highly complex and subject to interpretation. Significant judgement and estimates are required in determining the worldwide accrual for income taxes, deferred tax assets and liabilities and uncertain tax positions.

Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. This judgement is made annually and based on budgets and business plans, including planned commercial initiatives, for the coming five years unless a longer period in certain situations (e.g. for start-up businesses) is warranted. Currently, a longer period than five years has not been applied in any of the jurisdictions in which the T&W Medical A/S Group operates.

In the course of conducting business globally, tax and transfer pricing disputes with tax authorities may occur. Management judgement is applied to assess the possible outcome of such disputes. The "most probable outcome" method is used when determining whether to recognise any amounts related to such uncertain tax position. If it is probable that a tax adjustment will be required, the amount of such adjustment is measured at the most likely amount or the expected value, whichever method better predict the resolution of the uncertain tax position.

	953	1.000

Please refer to note 5.1 for further information about increases in goodwill related to the business combinations in 2022/23.

Impairment losses recognized

There was no impairment losses recognized on goodwill at 30 September 2023. An impairment loss of DKK 6.7 million was recognised on goodwill at 30 September 2022 due to sale of assets in the Group's retail outlet in the United Kingdom.

Accounting policies**Goodwill**

On initial recognition, goodwill is recognised and measured at cost as described in Accounting policies in note 5.1. Subsequently goodwill is measured at cost less accumulated impairment losses.

Goodwill is not amortized but is tested for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash generating units (CGUs) expected to benefit from synergies of the business combination, and that represent the lowest level at which the goodwill is monitored for internal management purposes. The lowest level at which the goodwill is tested for impairment is at the level of operating segments before aggregation according to IFRS 8 Operating Segments.

CGUs (or operating segments) to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the CGU may be impaired. If the recoverable amount of the CGU is less than the carrying amount of the CGU, the impairment loss is allocated first to reduce the carrying amount of goodwill allocated to the CGU and then to the other assets of the CGU on the basis of the carrying amount of each asset in the CGU. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Other intangible assets

Other intangible assets include development projects, acquired intellectual property, trademarks, patents and licenses, acquired customer contracts and relationships, software and other internally generated intangible assets.

Development projects that are clearly defined and identifiable, where the technical feasibility of completion, availability of adequate resources to complete, existence of potential future market can be demonstrated, and where Management has the intent to manufacture, market or apply the product or process in question are recognised as intangible assets. Other development costs are recognised as costs in the income statement as incurred. The costs of development projects comprise all directly attributable costs including wages, salaries, costs to external consultants, rent, materials and services and other costs.

Intangible assets other than goodwill are measured at cost less accumulated amortisation and impairment losses. Amortisation is provided on a straight-line basis over the expected useful lives of the assets to their estimated residual value if any.

The estimated useful lives are as follows:

- Completed development projects	3-5 years
- Patents, licenses and other similar rights	3-10 years
- Customer relationships acquired	2-10 years
- Customer contracts	15-20 years
- Trademark	20 years
- Acquired intellectual property	8-12 years
- Software and other internally generated intangible assets	3-10 years

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Significant judgements and accounting estimates

Internal development expenditure is capitalised only if it meets the recognition criteria of IAS 38 Intangible Assets. Where regulatory and other uncertainties are such that the criteria are not met, the expenditure is charged to profit and loss.

Where, however, recognition criteria are met, intangible assets are capitalised and amortised on a straight-line basis over their useful economic lives from product launch, of which judgement is required.

Costs incurred on development projects are recognized as an intangible asset when the following criteria are met:

- It is technically feasible to complete the product so that it will be available for use;
- Management intends to complete the product and use it;
- The product can be used;
- It can be demonstrated how the product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete development and use the product are available;
- The expenditure attributable to the product during its development can be reliably measured.

The Group has defined milestones for various phases of the development of new products, from the commencement of the project to successful realization and subsequently product launch. The criteria as required by IAS 38 for the recognition of development costs, have been adapted within the work processes of the first milestone, to ensure that all criteria have been met for development cost to be capitalized.

Determination of useful lives

Management applies judgements in determination of the useful lives of intangible assets.

For patents, licenses, acquired intellectual property and other intangible assets arising from contractual or other legal rights, the useful life is the shorter of the period of the contractual or legal rights and the economic useful life.

For acquired customer contracts and relationships, the useful life is based on normal attrition/churn rates within the hearing aid business in the market in question, with a maximum of 10 years, except in exceptional situations, where a longer useful life can be justified. The useful life for customer contracts is based on the contractual term including expected extensions of the term.

Identification of cash generating units

Management has determined that T&W Medical A/S has two operating segments in accordance with IFRS 8, to which goodwill is allocated:

- 1: Developing, producing and selling of hearing aids (WS Audiology A/S)
- 2: Development and commercializing of medical devices within UNEEG Medical A/S.

Management monitors goodwill at the operating segment level.

The T&W Medical A/S Group has contractual commitments for purchases of property, plant and equipment amounting to DKK 104 million as of 30 September 2023 (30 September 2022: DKK 92 million).

Accounting policies

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost comprises the purchase price and costs directly attributable to bringing the asset to its location and condition necessary for its intended use. In addition, the initial estimate of the costs related to dismantling and removing the asset and restoring the site on which the asset is located are added to the cost, if relevant. Where individual components of an item of property, plant and equipment, that is material, have different useful lives, they are accounted for as separate items, and depreciated separately. Borrowing costs are included in the cost for assets that necessarily take a substantial period of time to get ready for the intended use.

Depreciation is recognised on a straight-line basis over the expected useful lives of property, plant and equipment, taking into account the expected residual value after the end of the useful life. The expected useful lives are as follows:

The estimated useful lives are as follows:

- Factory and office buildings	20-50 years
- Technical machinery & equipment	4-10 years
- Other fixtures and fittings, tools and equipment, furniture etc.	3-5 years

Land is not depreciated.

Estimated useful lives and residual values are reassessed annually. If the residual value exceeds the carrying amount, depreciation is discontinued. When changing the expected useful lives or the expected residual value, the effect on the depreciation is recognized prospectively as a change in accounting estimates.

Depreciation is recognised in the income statement as production costs, development costs, distribution costs and administrative expenses.

3.3 Depreciation, amortization and impairment losses

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
<i>Depreciation and impairment of property, plant, equipment, right of use assets recognised in the income statement as follows:</i>		
Cost of goods sold	158	168
Research and development costs	22	26
Selling, general and administrative expenses	518	495
Total	698	689
<i>Amortization and impairment of intangible assets recognised in the income statement is as follows:</i>		
Cost of goods sold	276	341
Research and development costs	362	405
Selling, general and administrative expenses	931	999
Total	1.568	1.745

Depreciation, amortization and impairment of property, plant and equipment and intangible assets are contained in line items Cost of Sales, Research and development expenses or, selling and general administrative expenses, depending on the use of the asset.

Significant judgements and accounting estimates

Impairment

Goodwill, intangible assets with indefinite useful lives and intangible assets not yet available for use, e.g. development projects in progress, are not subject to amortisation, but are tested for impairment at least annually, irrespective of whether there is any indication that they may be impaired.

Other intangible assets, which are subject to amortisation, and property, plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If assets do not generate cash flows that are largely independent of those from other assets or groups of assets, the impairment test is performed at the level of the CGUs to which the asset belong.

Recoverability of assets is measured by comparing the carrying amount of the asset or CGUs with the recoverable amount, which is the higher of the asset's or CGU's value in use and its fair value less costs to sell.

If the carrying amount of an asset, or of the CGUs to which the asset belong, is higher than its recoverable amount, the carrying amount is reduced to the recoverable amount, and an impairment loss is recognised in the income statement.

Impairment of intangible assets, other than goodwill, and impairment of property, plant and equipment is reversed only to the extent of changes in the assumptions and estimates underlying the impairment calculation. Impairment is only reversed to the extent that the asset's new carrying amount does not exceed the carrying amount of the asset after amortisation had the asset not been impaired.

Impairment test – Goodwill

The recoverable amount of the CGU was tested on the basis of the higher of value in use and fair value less costs to sell. The value in use was determined on the basis of a discounted cash flow model, while the fair value less cost to sell was determined mainly by computing the Enterprise Value ("EV").

The EV was estimated as of 30 September 2023 by taking the market capitalization of a comparable peer group, adjusted for the most updated balance sheet numbers of interest-bearing debt and other liabilities with the carrying amounts. The estimated EV was then compared with the respective consensus EBITDA to derive multiple, taking into account an illiquidity discount and control premium.

The Group applied the EV/EBITDA multiple to the adjusted consensus EBITDA of WS Audiology; the carrying amount of the CGU was determined to be lower than its recoverable amount and the Group has therefore no impairment loss to be recognised.

Key assumptions used in the determination of the fair value less costs to sell are consensus EBITDA for the comparable companies as well as for WS Audiology, where adjustments for one-time cost as described in the management commentary were factored in. Furthermore, in using the market based EV/EBITDA multiple models, the Group has applied relevant illiquidity discounts and control premiums to reflect the ownership structure of WS Audiology. The adjusted consensus EBITDA is based on Management's best estimates and most recent financial budgets for the coming year as approved by the Board of Directors. All the above inputs are level 3 input factors according to the fair value hierarchy.

Management has not identified any reasonably possible changes in the above key assumptions that could cause the carrying amount to exceed the recoverable amount.

3.4 Right of use assets/Lease liabilities

Total cash outflow for all leases	(448)	(383)

The maturity analysis of the lease liabilities is included in Note 4.2 Financial risks and financial instruments/liquidity risk.

Accounting policies

When the Group is the lessee:

At the inception of the contract, the Group assesses if the contract contains a lease. A contract contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Reassessment is only required when the terms and conditions of the contract are changed.

Right of use assets

The Group recognised a right of use asset and lease liability at the date which the underlying asset is available for use. Right of use assets are measured at cost which comprises the initial measurement of lease liabilities adjusted for any lease payments made at or before the commencement date and lease incentive received. Any initial direct costs that would not have been incurred if the lease had not been obtained are added to the carrying amount of the right of use assets.

These right of use assets are subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right of use assets or the end of the lease term.

Lease liabilities

The initial measurement of lease liability is measured at the present value of the lease payments discounted using the implicit rate in the lease if the rate can be readily determined. If that rate cannot be readily determined, the incremental borrowing rate is used.

Lease payments include the following:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivables;
- Variable lease payments that are based on an index or rate, initially measured using the index or rate as at the commencement date;
- Amount expected to be payable under residual value guarantees;
- The exercise price of a purchase option if it is reasonably certain to exercise the option; and
- Payment of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

For contracts that contain both lease and non-lease components, the Group allocates the consideration to each lease component on the basis of the relative stand-alone price of the lease and non-lease component. The Group has elected to not separate lease and non-lease component for property leases and account for these as one single lease component.

Lease liability is measured at amortised cost using the effective interest method. Lease liability is remeasured when:

- There is a change in future lease payments arising from changes in an index or rate;
- There is a change in the Group's assessment of whether it will exercise an extension option; or
- There is a modification in the scope or the consideration of the lease that was not part of the original term.

Lease liability is remeasured with a corresponding adjustment to the right of use asset, or is recorded in profit or loss if the carrying amount of the right of use asset has been reduced to zero.

Short term and low value leases

The Group has elected to not recognise right of use assets and lease liabilities for short-term leases that have lease terms of 12 months or less and low value leases, except for leased asset subject to sublease arrangements. Lease payments relating to these leases are expensed to profit or loss on a straight-line basis over the lease term.

3.5 Other non-current and current financial assets

	30 September 2023	30 September 2022
Other non-current financial assets		
Customer loans	425	373
Other loans	1.431	1.358

Other current financial assets		
Customer loans	119	146
Derivative financial instruments	455	55
Other securities and equity investments	581	613
Other loans	48	-
Total	1.203	814

The below table shows the carrying amount of customer loans by categories representing Management's credit risk assessment (credit risk rating grades) and gross carrying amounts.

Credit rating DKKm	Expected credit loss (ECL) rate	Basis for recognition of expected credit loss	Estimated gross carrying amount at default
Performing	1%	12-month expected credit loss (Low risk)	365
Performing	5%	12-month expected credit loss (Medium risk)	142
Underperforming	38%	Lifetime expected credit losses (High risk)	60
Credit impaired	93%	Assets derecognised through the income statement (In default)	112
Total customer loans at 30 September 2023			679

Credit rating DKKm	Expected credit loss (ECL) rate	Basis for recognition of expected credit loss	Estimated gross carrying amount at default
Performing	1%	12-month expected credit loss (Low risk)	385
Performing	6%	12-month expected credit loss (Medium risk)	78
Underperforming	47%	Lifetime expected credit losses (High risk)	81
Credit impaired	86%	Assets derecognised through the income statement (in default)	139
Total customer loans at 30 September 2022			684

DKKm	Performing (12-month ECL-Low risk)	Performing (12-month ECL-Medium risk)	Underper- forming (Lifetime ECL)	Credit impaired (Lifetime ECL)	Total
Opening loss allowance as at 1 October 2022	2	4	38	121	164
Foreign currency translation differences	-	-	-	(7)	(7)
Net Impairment losses for the year (net reversal) for the year	-	-	(15)	(7)	(22)
Closing loss allowance as at 30 Septem- ber 2023	2	4	23	106	135
Opening loss allowance as at 1 October 2021	14	5	46	117	182
Foreign currency translation differences	(13)	-	9	29	25
Net Impairment losses for the year (net re- versal) for the year	1	(1)	(17)	(25)	(43)
Closing loss allowance as at 30 Septem- ber 2022	2	4	38	121	164

The following significant changes in gross carrying amount of customer loans contributed to changes in the loss allowance:

- New customer loans of DKK 164 million (2022: DKK 100 million) were issued in the year ended 30 September 2023;
- Customer loans with gross carrying amount of DKK 7 million (2022: DKK 4 million) went from performing to underperforming during the year ended 30 September 2023;
- Customer loans with a gross carrying amount of DKK 127 million (2022: DKK 178 million) were repaid in the period in the year ended 30 September 2023.

Accounting policies

Customer loans

Customer loans are initially recognised at fair value less transaction costs and subsequently measured at amortised cost less loss allowance or impairment losses. Any difference between the nominal value and the fair value of the loans at initial recognition is treated as a prepaid discount on future sales to the customer, and is recognised in the income statement as a reduction of revenue as and when the customer purchases goods from the WS Audiology A/S Group.

The fair value of customer loans at initial recognition is measured at the present value of future repayments of the loan discounted at a market interest rate corresponding to the money market rate based on the expected maturity of the loan with the addition of a risk premium. The effective interest on customer loans is recognised as interest income in the income statement over the term of the loans.

A loss allowance is recognised at initial recognition and subsequently based on 12-months expected credit losses, unless a significant increase has arisen since the initial recognition of the loan, in which case the loss allowance is based on lifetime expected credit losses.

Customer loans are written off when all possible options have been exhausted and there is no reasonable expectation of recovery.

Other loans and receivables, including loans to associates

Other loans and receivables, including loans to associates are recognised initially at fair value less directly attributable transactions costs. Subsequently, they are measured at amortised cost using the effective interest method less impairment. A loss allowance is recognised at initial recognition and subsequently based on 12-months expected credit losses, unless a significant increase has arisen since the initial recognition of the loans and receivables, in which case the loss allowance is based on lifetime expected credit losses.

Issued loans with conversion options are measured in their entirety at fair value through profit or loss. Fair value is determined using discounted cash flows based on forward rate curve.

Other investments

Other investments comprise listed and unlisted securities, which are measured at fair value through profit or loss.

Significant judgements and accounting estimates

Customer loans

The T&W Medical A/S Group grants sales related financing in the form of loans to some of its customers. These customer loan arrangements are complex, cover several aspects of the customer relationship and may vary from agreement to agreement.

Management has determined that off-market terms, if any, represent a prepayment of discounts on future sales to the customer.

Significant accounting estimates are involved in determination of the expected maturity of the loans, as repayments may to some extent be aligned with the customers purchases of goods, and also in determining a market based discount rate for each customer loan. Management estimates are based on current market condition at the time of issuing the loan as well as historical sales information and e.g. market penetration rates for loans to customers without substantial history with the T&W Medical A/S Group.

The T&W Medical A/S Group's assessment of credit risk associated with customer loans and prepaid discounts primarily involves consideration of the economic environment in which the customer operates, historic loss rates for customer loans, and the actual repayments on the loans compared to the repayment plan agreed when the loans were issued, along with any new significant development across the macroeconomic landscape, such as COVID-19. This assessment is performed using a scoring matrix that covers 3 broad categories namely customer type, payment and performance and risk and bankruptcy. Based on the credit score assessed, the risk category of the customer will be determined to be one of the following:

- Low risk (performing)
- Medium risk (performing)
- High risk (underperforming)
- In default

For customer loans performing in all material respect, and for which no other indications of increase in credit risk exist, the expected credit loss on the customer loan and related prepaid discount is measured at 12-month expected credit loss. For customer loans that are underperforming compared to the repayment plan agreed when the loans were issued, or for which there are other indications of increase in credit risk, the expected credit loss is measured at lifetime expected credit loss.

Loss rates are based on actual credit loss experience over the past years. These rates are multiplied by factors to reflect possible differences between economic conditions during the period over which the historic data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

The calculation of 12-month expected credit losses on customer loans are based on a weighted average of historical annual losses on customers. Payment plans are agreed with customers when issuing loans to these. The credit risk of loans to customers is considered to have increased significantly since initial recognition when actual loan balances differ from the agreed development in loan balances with more than 50%. At this point the loan is considered to be in default and credit impaired.

Based on the above, the customer loans and related prepaid discount are categorised as either performing, non-performing or credit impaired.

3.6 Other assets

Other non-current assets

DKKm	30 September 2023	30 September 2022
Prepaid assets, non-current	22	5
Assets for deferred compensation plan	82	72
Deposits	52	66
Others	75	74
Total	232	217

Other current assets are as follows:

Other current assets

DKKm	30 September 2023	30 September 2022
Pre-paid expenses	231	163
Loan receivables from third parties	94	101
Miscellaneous tax receivables	291	207
Deposits	15	89
Others	107	141
Total	738	701

Accounting policies

Other assets

Other assets are recognized initially at fair value less directly attributable transactions costs. Subsequently, they are measured at amortized cost using the effective interest method less impairment. A loss allowance is recognized at initial recognition and subsequently based on 12-months expected credit losses, unless a significant increase has arisen since the initial recognition of the loans and receivables, in which case the loss allowance is based on lifetime expected credit losses.

3.7 Inventories

DKKm	30 September 2023	30 September 2022
Raw materials and purchased components	709	680
Work in progress	157	152
Rights to returned goods	97	107
Finished goods and goods for resale	588	546
Inventories	1.551	1.485

Write-downs, provisions for obsolescence etc. included	(283)	(318)
--	-------	-------

Included in the income statement under production costs:

DKKm	30 September 2023	30 September 2022
Write-downs of inventories for the year	-	(42)
Reversals of write-downs of inventories for the year	22	
Cost of goods sold during the year	(5.198)	(5.703)
Total	(5.175)	(5.746)

Accounting policies

Inventories are measured at the lower of cost and net realisable value, cost being generally determined on the basis of a weighted average or FIFO method. Cost comprise raw materials, consumables, direct labour and indirect production overheads. Indirect production overheads comprise indirect supplies, wages, and salaries, amortisation of brands and software, as well as maintenance and depreciation of machinery, plant and equipment used for production.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

3.8 Trade receivables

DKKm	Current not due	1-30 days past due	31-60 days past due	61-90 days past due	91-180 days past due	More than 181 days past due	Total
Gross carrying amount							
- Trade receivables	2.012	231	104	60	104	217	2.728

Expected loss rate -1,1% -3,2% -7,2% -12,6% -29,5% -75,8% -8,8%

DKKm	Current not due	1-30 days past due	31-60 days past due	61-90 days past due	91-180 days past due	More than 181 days past due	Total
Gross carrying amount							
- Trade receivables	2.011	203	94	80	123	223	2.735
Sales rebates	(244)	-	-	-	-	-	(244)
Loss allowance at 30 September 2022	(45)	(5)	(5)	(5)	(16)	(141)	(215)
Trade receivables at 30 September 2022	1.722	199	89	75	107	82	2.274

Expected loss rate -2,3% -2,2% -5,5% -5,7% -12,7% -62,9% -7,9%

The below table shows the movement in lifetime expected credit losses that has been recognised for trade receivables and contract assets in accordance with the simplified approach set out in IFRS 9.

DKKm	Collectively assessed	Individually assessed	Total
Opening loss allowance as at October 2022	(17)	(198)	(215)
Net remeasurement of loss allowance	-	(1)	(1)
Amounts written off	-	-	-
Other changes	-	-	-
Closing loss allowance as at 30 September 2023	(17)	(199)	(216)
Opening loss allowance as at October 2021	(21)	(184)	(204)
Net remeasurement of loss allowance	(5)	(9)	(14)
Amounts written off	7	3	10
Other changes	2	(9)	(7)
Closing loss allowance as at 30 September 2022	(17)	(198)	(215)

Receivables acquired in business combinations are recognised in the consolidated financial statements at fair value at the date of acquisition, which in most cases equals the carrying amounts net of loss allowance. Expected credit losses related to receivables acquired in business combinations are therefore only included in the above to the extent that the loss allowance for the receivables has increased compared to the acquisition date.

..

Accounting policies

Trade receivables and contract assets are measured at amortised cost less allowance for lifetime expected credit losses.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. For trade receivables and contract assets that are considered credit impaired, the expected credit loss is determined individually.

Trade receivables and contract assets are written off when all possible options have been exhausted and there is no reasonable expectation of recovery.

Significant judgements and accounting estimates

T&W Medical A/S Group has historically suffered insignificant credit losses on trade receivables and contract assets.

Loss allowance is calculated using a provision matrix that incorporates an ageing factor, geographical risk and specific customer knowledge. The provision matrix is based on historical credit losses incurred within relevant time bands of days past due adjusted for a forward looking element.

3.9 Other liabilities

Other non-current liabilities are as follows:

DKKm	30 September 2023	30 September 2022
Derivative financial instruments	15	51
Deferred revenue	172	202
Employee related liabilities	22	30
Liability under MPP scheme	395	367
Others	40	57
Total	644	707

Other current liabilities are as follows:

DKKm	30 September 2023	30 September 2022
Accrued interest	766	447
Bonuses and discounts to customers	142	90
Customers with net credit balances	67	86
Customer prepayment	90	103
Deferred income	104	106
Derivative financial instruments	15	25
Employee related liabilities	612	800
Payroll and social security liabilities	346	363
Sales tax and other tax liabilities	146	126
Earnout provision	-	52
Bonus obligations	11	2
Other	195	244
Total	2.489	2.443

Earn-out provision is presented in "Provisions" in the current year.

Accounting policies

Other financial liabilities are measured initially at fair value less transaction costs and subsequently at amortised cost using the effective interest rate method.

The Group bifurcates embedded derivatives at initial recognition when they are not closely related to the respective host contract. Bifurcated derivatives are measured at fair value through profit or loss.

Other liabilities are measured at cost.

3.10 Provisions

Provision at 30 September 2022	393	228	42	-	124	787

Which is presented in the consolidated balance sheet as:

Non-current	163	1	42	-	2	208
Current liabilities	230	227	-	-	121	579
Provision at 30 September 2022	393	228	42	-	123	787

The Group's provisions are generally expected to result in cash outflow during the next one to ten years.

Right of return relates to products sold for which customers have the right to return the products at their own discretion within a specified period. Based on historical data, return rates are calculated and provisions are recorded to cover the expected cost.

Warranties represents Management's best estimate of the Group's liability under assurance type warranties granted on hearing aids sold. The warranty period of regular assurance type warranties differ depending on jurisdiction and range between 1 and 3 years.

Asset retirement obligation relates to the Group's obligations to restore rented premises to the certain standards upon the expiry of the lease contracts including removal of leasehold improvements and other assets from the premises.

Earnout provision from business combinations relates to components of the purchase price for which the payments depend on the achievement of defined performance measures. For additional information related to business combinations in the period, refer to Note 5.1.

Accounting policies

Current liabilities

A provision is recognised in the statement of financial position when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect is material, provisions are measured at present value by discounting the expected future cash flows expected to settle the liability at a pre-tax rate that reflects current market assessment of the time value of money.

Significant judgements and accounting estimates

Significant estimates are involved in the determination of provisions related to warranty costs, right of return, legal proceedings and onerous contracts. Due to the technological features of the Group's products, the Group incurs a substantial amount of warranty costs and the determination of future warranty costs related to products sold is based on historic results as well as estimated product defects.

The Group is from time to time subject to legal disputes and regulatory proceedings in several jurisdictions. Such proceedings may result in criminal or civil sanctions, penalties, damage claims and other claims against the Group. Regulatory and legal proceedings as well as government investigations often involve complex legal issues and are subject to substantial uncertainties. Accordingly, Management exercises considerable judgement in determining whether there is a present obligation as a result of a past event, whether it is more likely than not that an outflow of economic resources will be required and the estimated amount of such outflow. Management consider the input of external counsels on each case, as well as known outcomes in case law. Although, Management believes that the total provisions for legal proceedings are adequate based on currently available information, there can be no assurance that there will not be any changes in facts or circumstances, or that any future lawsuits, claims, proceedings or investigations will not be material.

In some jurisdictions, the T&W Medical A/S Group sells extended warranties to customers and/or provide other service-type warranties in addition to regular (assurance-type) warranties. Such warranties are treated as separate performance obligations in the contracts with the customers and are recognised as contract liabilities and not provisions. In determining whether a warranty is an assurance type warranty or a service type warranty, Management considers factors such as whether the warranty is required by law, the length of the warranty coverage period and the nature of the tasks that the entity promises to perform in case of product defects. Generally, warranties covering periods after 3 years from the sale of the hearing aid are considered to be service-type warranties and treated as separate performance obligations.

4 Capital structure and financing items

4.1 Outstanding shares

All shares are fully issued and paid up. In the fiscal year 2022/23, the share capital was increased by DKK 63.774.688 B-Shares shares at a nominal value of DKK 1 per share. After the capital increase, the Group's share capital of DKK 563.774.688 is divided into 2.000.000 A-shares and 561.774.688 B-shares with the voting rights only on A-Shares but equal dividend rights. There are no restrictions on the negotiability or voting rights.

Capital Structure

The Group's ambition is to maintain access to a strong capital base and with a high degree of investor, creditor and market confidence to support the strategic development of the Group. To support this ambition, the Group has obtained a credit rating from the three rating agencies Moody's, Standard & Poor and Fitch Ratings.

The capital structure of the Group consists of net debt (short-term and long-term borrowings disclosed in Note 4.2 after deducting cash and cash equivalents) and equity of the Group (comprising issued capital, reserves, retained earnings and non-controlling interests).

The Group raised debt in 2019 to finance the establishment of the Group through the merger of Sivantos and Widex. In June 2020, the Group raised an additional Sidecar loan of EUR 100.0 million with a backup guarantee from the Danish Export Credit Foundation (EKF) as contingency working capital in the face of COVID-19. This sidecar loan was repaid in December 2021 with an add on of EUR 100,0 million to Facility B1. The Group's debt is shown in table below:

FY 2023

Debt	Interest rate	Hedge interest
Facility B1 EUR 2.063 million	Euribor + 4,0 %	Partly till FY 2024
Facility B2 USD 1.180 million	USD Libor + 3,75 %	Partly till FY 2024
2 nd Lien Loan EUR 525 million	Euribor + 6,75 %	Partly till FY 2024
Revolving Facility EUR 85 million	Euribor + 2,75 %	No
Danske Bank DKK 1.640 million	CIBOR + 0,75 %*	No
Danske Bank DKK 400 million	CIBOR + 3,50 %	No

*Subject to adjustment for changing capital relief value

FY 2022

Debt	Interest rate	Hedge interest
Sidecar Loan EUR 100 million	Euribor + 4,5%	No
Facility B1 EUR 1.962 million	Euribor + 4,0 %	Partly till FY 2024
Facility B2 USD 1.204 million	USD Libor + 3,75 %	Partly till FY 2024
2 nd Lien Loan EUR 525 million	Euribor + 6,75 %	Partly till FY 2024
Revolving Facility EUR 90 million	Euribor + 2,75 %	No
Danske Bank DKK 1.640 million	CIBOR + 0,75 %*	No

If Euribor or Libor is less than zero, the rate shall be deemed zero.

The Senior Secured Term Loans are secured by a pledge of the shares of major subsidiaries as well as pledge of assets of major subsidiaries and are subject to a loan covenant. The Group has complied with to the loan covenants of the Senior Facilities Agreement.

Interest rate benchmark transition for non-derivative financial instruments

The Group has repriced its loans from LIBOR equivalent rates to Term SOFR. Due to the bi-annual interest setting, the first interest period priced on Term SOFR takes effect from 31 October 2023. The Group does not foresee any material changes from the change in interest rate benchmark.

Accounting Policies

Proposed dividend is recognised as a liability at the date when it is adopted at the Annual General Meeting (declaration date). The dividend recommended by the Board of Directors, and therefore expected to be paid for the year, is disclosed in the notes.

4.2 Financial risks and financial instruments

Financial risk management

The Group is exposed to several financial risks arising from its operating, investing and financial activities, including market risk (foreign exchange risk and interest rate risk), liquidity risk and credit risk.

Risks arising from financial investments are managed in the holding companies (TWM and TWH) in accordance with the approved investment strategy. Those financial risks that arise from the operation of WSA Group are managed by WSA Group Treasury in accordance with the approved policies on Foreign Currency and Interest Hedging Policy approved by Group CFO. The WSA Group enters financial instruments only to mitigate these financial risks. It is the WSA Group policy to maintain investor, creditor and market confidence, and to sustain future development of the business. The objective, policies and processes for managing the risk exposure to these items are summarized in the table below and further explained in the following sections. The WSA Group is managed centrally by Management, which is responsible for the operating business, comprising commercial risk with hedge accounting to reduce volatility in the income statement.

Credit risk

Credit risk is defined as an unexpected loss in cash and earnings if the customer is unable to pay its obligations in due time. The Group may incur losses if the credit quality of its customers deteriorates or if they default on their payment obligations to the Group. The Group's exposure to credit risk arises primarily from trade and other receivables including loans to customers.

The Group has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. This includes the review of individual receivables and of individual customer creditworthiness on a case-by-case basis as well as the review of current economic trends, the analysis of historical bad debts on a portfolio basis, and the considers country credit ratings. Credit evaluations are performed on all customers requiring credit over a certain amount. The Group does not require collateral in respect of financial assets. However, the Group has credit enhancements such as personal guarantees and share pledge related to customer loan. Assessment of the credit risk related to customers is further described in note 3.5 Other non-current and current financial assets and Note 3.8 Trade receivables.

There were no significant concentrations of credit risk as of 30 September 2023 and 30 September 2022.

The maximum exposure to credit risk of financial assets is represented by their carrying amount. Concerning trade receivables and other receivables, as well as loans or receivables included in line item Other financial assets that are neither impaired nor past due, there were no indications as of 30 September 2023 (30 September 2022: Nil), that defaults in payment obligations will occur.

Liquidity risk

Liquidity risk result from the Group's potential inability to meet its financial liabilities.

The Group finances itself from its operating cash flow and through access to DKK 1.934 million of committed Revolving Credit provided by a group of banks – of which DKK 699 million has been carved out as ancillary facilities.

The Group had cash and cash equivalents of DKK 967 million as of 30 September 2023 (30 September 2022: DKK 1.001 million). In addition, the Group has access to DKK 1.235 million (30 September 2022: DKK 787 million) available Revolving Credit Facility as of 30 September 2023. With its strong operating cash flow, the Group expects to be able to meet all of its present and future obligations arising from operational cash needs.

In addition to having implemented effective working capital and cash management, the Group has implemented short-term and medium term liquidity forecasts. Group Treasury monitors the level of expected cash inflows on trade and other receivables together with expected cash out-flows on trade and other payables.

The Group maintains an in-house banking and cash pool setup. A significant part of cash balances from affiliates is pooled centrally with Group Treasury to secure an effective liquidity management and use of funds within the Group.

The following table reflects all contractually fixed payoffs for settlement, repayments and interest resulting from recognized financial liabilities. It includes expected net cash outflows from derivative financial liabilities that were in place at 30 September 2023 and 30 September 2022. Such expected net cash outflows are undiscounted net cash outflows for the respective upcoming fiscal years, based on the earliest date on which the Group could be required to pay. Cash outflows for financial liabilities (including interest) without fixed amount or timing are based on the conditions existing at 30 September 2023 and 30 September 2022.

DKKm	Less than	Between	More than	Total
	1 year	1-5 years	5 years	
30 September 2023				
Interest-bearing debt	928	29.204	-	30.132
Lease liabilities	296	815	-	1.111
Trade payables	1.875	-	-	1.875
Other financial liabilities	582	380	-	962
Total non-derivative financial liabilities	3.681	30.399	-	34.080
Derivative financial liabilities	15	15	-	30
DKKm	Less than	Between	More than	Total
	1 year	1-5 years	5 years	
30 September 2022				
Interest-bearing debt	924	29.445	-	30.369
Lease liabilities	297	695	-	992
Trade payables	1.620	-	-	1.620
Other financial liabilities	1.278	419	-	1.697
Total non-derivative financial liabilities	4.120	30.558	-	34.678
Derivative financial liabilities	25	51	-	77

The risk implied from the values in the table above reflects the one-sided scenario of cash outflows only. Obligations under trade payables and other financial liabilities mainly originate from the financing of assets used in the Group's ongoing operations such as property, plant and equipment, and investments in working capital such as inventories and trade receivables. These assets are considered in the Group's overall liquidity risk management.

Foreign currency risk

Translation risk and effects of foreign currency translation

Most of the Group's entities are located outside the Eurozone. Since the Group's reporting currency is EUR, the financial statements of foreign operations are translated into EUR for the preparation of the consolidated financial statements. To consider the effects of foreign currency translation in the risk management, the general assumption is that investments in foreign operations are permanent and that reinvestment is continuous. Effects from foreign currency exchange rate fluctuations on the translation of net assets amounts into EUR are reflected in the Group's consolidated statement of changes in equity. The Group does not hedge net investments in foreign operations.

Sensitivity analysis for foreign currency risk

The following table demonstrates the approximate effect on the Group's Total comprehensive income statement (financial items) in response to fluctuation of the currencies other than the respective group entities' functional currencies. This analysis comprises effects from the Group's cash, trade receivables, trade payables and loans. All other variables, in particular interest rates are assumed to be constant.

30 September 2023	
DKKm	Profit/(Loss)
USD +5%	(447)
CAD +5%	(37)
BRL +5%	15
30 September 2022	
DKKm	Profit/(Loss)
USD +5%	(431)
CAD +5%	22,3
BRL +5%	17,8

Interest rate risk

At 30 September 2023, the Group's long-term debt consists of secured term loans of DKK 15.748 million (2022: DKK 15.338 million) and USD 1.180 million (2022: USD 1.192 million) as well as 2nd lien term loan of DKK 3.911 million (2022: DKK 3.904 million) with a floating interest rate of which 90% (2022: 90%) have been swapped into fixed interest rate. The Group have applied hedge accounting in relation to these interest rate swaps effective October 2022.

Specification of net interest-bearing debt

DKKm	30 September 2023	30 September 2022
Cash and cash equivalents	967	1.001
Bank loans, non-current liabilities	(29.204)	(29.445)
Bank loans, current liabilities	(928)	(924)
Total net interest-bearing debt	(31.099)	(29.368)

The Group is exposed to change in the following interest rates: EURIBOR and LIBOR. The sensitivity analysis has been determined based on the exposure to interest rates at the reporting date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding (after hedging) at the reporting date was outstanding for the whole year. A 1% per cent increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

At 30 September 2022, if interest rates had been 1 per cent higher and all other variables were held constant, the Group's loss for the year ended 30 September 2022 would reduce by DKK 30 million (2021: DKK 29 million). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings.

Hedging of future cash flows

Foreign currency risk hedging

The Group has cash flow in foreign currencies due to its international operations and USD denominated debt which exposes the Group to fluctuations in exchange rates vs reporting currency EUR. Foreign currency exchange rate fluctuations may create unwanted and unpredictable earnings and cash flow volatility. The Group manufactures and distributes most of its products at its headquarters in Singapore and Denmark. The products are sold to its regional affiliates and as a general principle invoiced in the currency of the buying entities.

The majority of the Group's sales and costs are in USD, JPY, GBP, AUD, CAD and SGD. The Group's hedging policy is to reduce the Group currency exposure mainly through employment of foreign exchange forward contracts to mitigate the Group's major risks from adverse foreign exchange movements impact on net cashflow for 3 - 12 months rolling forward.

The foreign currency risk is centrally managed by Group Treasury. The policy for the Group is to maintain an adequate hedging level of between 40% and 75% of the net foreign currency exposure. Group Treasury is not allowed to undertake any financial transactions in foreign currencies of a speculative nature. The Group mainly uses foreign currency forward contracts to hedge its foreign currency risk on its revenue and cost of goods to mitigate negative impacts of adverse development from foreign exchange risk on the operating result of the Group.

Hedged Items – Foreign currency hedge

The hedged items are forecast transactions denominated in foreign currencies. The ineffective portions of these hedges are insignificant.

Interest rate risk hedging

The Group has long-term loans on floating interest rate which expose the Group to interest rate fluctuations. Interest rate swaps are used to hedge interest rate risks arising from floating rate loans. The strategy for the Group is to maintain a mid-term adequate hedging ratio between 35% to 90% of its interest rate exposure. The Group applied hedge accounting in relation to these interest rate swaps effective from 1 October 2021.

Change in fair value:		
Foreign currency risk – cash flow hedge	*	63
Interest rate risk – cash flow hedge	(386)	778
Amounts reclassified to profit or loss:		
Foreign currency risk – cash flow hedge	-	(36)
Tax effect	(97)	(193)
Carrying amount at 30 September	132	615

Accounting policies**Derivative financial instruments, including hedge accounting**

The Group uses various financial instruments to reduce the impact of foreign exchange and interest rates on financial results. The derivative financial instruments are used to manage the exposure to market risk. Treasury enters into derivative contracts in accordance with Group policies. Financial instruments used include e.g. foreign currency exchange contracts, interest rate swaps, interest rate floors and redemption options (the latter two being bifurcated embedded derivatives).

All derivative financial instruments are recognised initially and subsequently at fair value. Any attributable transaction costs are recognised in the income statement in other financial income, net as incurred.

On initial recognition, Management determines if the derivative financial instrument qualifies for hedge accounting and if so designates the instrument as a hedging instrument in a fair value hedge, cash flow hedge or hedge of net investment respectively.

Cash flow hedges

For cash flow hedges, the portion of the fair value adjustments on the hedging instrument that is an effective hedge is recognised in other comprehensive income and accumulated in a separate reserve in equity. The cumulative fair value adjustments of these contracts is transferred from the reserve in equity and recycled to the income statement through other comprehensive income when the hedged transaction is recognised in the income statement. However, when the forecast transaction subsequently result in the recognition of a non-financial asset or non-financial liability, the transfer from the reserve in equity is recognised directly in the initial cost or other carrying amount of the asset or liability without recycling through other comprehensive income.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in the reserve within equity at that time remains in the reserve and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss existing in the reserve is immediately transferred to the income statement as a recycling through other comprehensive income and recognised in other financial income, net.

Type	Valuation Technique	Significant unobservable inputs	Sensitivity of fair value to significant unobservable inputs
FX contracts	The fair value of the exchange rate contracts is based on forward exchange rates. Currency options are valued on the basis of quoted market prices or on estimates based on option pricing models with marked-standard inputs including implied volatility (level 2).	Not applicable	Not applicable
Interest rate swaps	The fair value of Interest Rate Swaps are determined using discounted cash flows of fixed leg and Net Present Value of floating leg based on Forward rate curve, and can be categorized as level 2 (observable inputs) in the fair value hierarchy.	Not applicable	Not applicable
Interest rate floors	The fair value of Interest Rate Floors is based on discounted cash flows or floorlets for intrinsic and option pricing models with implied volatility for time value component.	Implied volatility	Higher implied volatility will lead to higher fair value and vice versa
Redemption call option	Hull-White-Two-Factor model simulating interest-rate changes as well as credit spread changes is the valuation technique applied to cancellation rights with implied volatility of options on CDS as unobservable input (level 3). An increase in implied volatility will lead to an increase in fair value and vice versa.	Implied volatility of Options on CDS	Higher implied volatility will lead to higher fair value and vice versa
Other loans	Issued loans with conversion options are measured in their entirety at fair value through profit or loss. Fair value is determined using discounted cash flows based on forward rate curve.	Implied volatility	Higher implied volatility will lead to higher fair value and vice versa

The following table shows the reconciliation of level 3 fair value measurements of the interest rate floors and the redemption call option:

DKKm	1 October 2022 - 30 September 2023
Carrying amount 1 October 2022	(51)

Carrying amount 30 September 2023	(15)

Offsetting, Master netting agreements and similar arrangements

The T&W Medical A/S Group enters into derivative transactions under International Swaps and Derivatives Association (ISDA) master netting agreements/FX Payment Netting Agreements. In general, under such agreements the amounts owed by each counterparty on a single day in respect of all transactions outstanding in the same currency are aggregated into a single net amount that is payable by one party to the other. In certain circumstances – e.g. when a credit event such as a default occurs – all outstanding transactions under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions.

Liabilities af 30 September 2023	30.816	336	52	(753)	992	-	31.443

Accounting policies

Financial liabilities, other than derivatives, are initially recognized at fair value less transaction costs, and subsequently measured at amortized cost using the effective interest method. Accordingly, the difference between the proceeds and nominal value is recognized in the income statement over the term of the liability.

4.4 Financial income and expenses

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
Interest income fixed income	86	63
Interest income customer loans	8	12
Other interest income	730	49
Total	824	124
Interest expenses	(2.562)	(2.096)
Interest expense from pension plans	-	(2)
Other interest expenses	(26)	(7)
Total	(2.588)	(2.105)
Other financials, net		
Foreign currency translation gains/(losses)	589	(1.385)
Change in fair value of embedded derivatives	37	294
Change in fair value of financial instruments	30	734
Others	(57)	(5)
Total	599	(362)

Interest income/(expense) includes the interest/(expense) from financial assets/(financial liabilities) not measured at fair value through profit or loss.

Accounting policies

Financial income and expenses comprise interest income and expenses, gains and losses on securities, receivables, payables and transactions denominated in foreign currencies, credit card fees, amortisation and impairment of financial assets other than trade receivables and contract assets and liabilities, gains and losses on derivative financial instruments not designated as hedging instruments etc.

Interest income and expenses on financial assets and liabilities measured at amortised cost is recognised using the effective interest method. Other financial income and expenses are recognised on an accrual basis in the period to which they relate.

5 Other disclosures

5.1 Business combinations

The Group had completed various acquisitions during the year. The acquisitions are meant to increase the Group's footprint in various regions and expand its technological capabilities.

The amounts recognized in respect of the identifiable assets acquired and liabilities assumed are as set out in the table below.

DKKm	30 September 2023	30 September 2022
<i>Assets acquired</i>		
Other intangible assets	7	89
Property, plant and equipment	7	7
Inventories	15	30
Trade and other receivables	15	15
Other current assets	-	7
Cash and cash equivalents	*	7

Fair value of call option	-	15
Non-controlling interest	-	(7)
Total consideration	68	268
Cash and cash equivalents acquired	*	(7)
Total cash consideration paid	68	261

* Amount less than DKK 1 mil

Other acquisitions

During the year, the Group acquired various retail chains which are not individually material.

The Group incurred acquisition-related cost of DKK 2 million (2022: DKK 1 million) for audit, legal and due diligence services. These costs have been included as part of profit or loss when incurred.

Share of the revenue and profit/(loss) from acquisitions:

Share of revenue**DKK m****30 September 2023**

Share of revenue and profit/(loss) for the year from the acquisition date:

Revenue	52
EBIT	7
Loss for the year	7

The share of revenue and profit/(loss) if acquisition had taken place at 1 October 2022:

Revenue	75
EBIT	(8)
Loss for the year	(8)

Accounting policies

Newly acquired or newly established enterprises are recognised in the consolidated financial statements from the time of acquisition or formation. The time of acquisition is the date when control of the enterprise is transferred to the Group. On acquiring new enterprises of which the Group obtains control, the purchase method is applied according to which their identified assets, liabilities and contingent liabilities are measured at their fair values on the acquisition date. Any non-current assets acquired for the purpose of resale are, however, measured at their fair values less expected costs to sell. Restructuring costs are solely recognised in the pre-acquisition balance sheet if they are a liability for the acquired enterprise. Any tax effect of revaluations will be taken into account.

Goodwill is measured at the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the Group's previously held equity interests in the acquiree (if any) over the net of acquisition date fair values of the identifiable assets and liabilities and contingent liabilities. Goodwill is not amortised but tested at least annually for impairment. The first impairment test is performed within the end of the acquisition year.

The consideration transferred consists of the fair value of the consideration paid for the enterprise. If the final consideration is conditional upon one or more future events, the consideration will be recognised at the fair value on acquisition. Any subsequent adjustment of contingent consideration is recognised directly in the income statement, unless the adjustment is the result of new information about conditions prevailing on the acquisition date, and this information becomes available up to 12 months after the acquisition date. Transaction costs are recognised directly in the income statement when incurred.

If, on the acquisition date, there are any uncertainties with respect to identifying or measuring acquired assets, liabilities or contingent liabilities or uncertainty with respect to determining their cost, initial recognition will be made on the basis of provisionally calculated values. Such provisionally calculated values may be adjusted, or additional assets or liabilities may be recognised up to 12 months after the acquisition date, if new information becomes available about conditions prevailing on the acquisition date, which would have affected the calculation of values on that day, had such information been known.

Non-controlling interests are measured at the transaction date at either fair value or at its proportionate share of the fair value of identified net assets, determined on a transaction-by-transaction basis.

When a business combination is achieved in stages, the Group's previously held interests in the acquired business are remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in the income statement. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in Other comprehensive income are reclassified to the income statement, where such treatment would be appropriate if that interest were disposed of.

Goodwill and fair value adjustments in connection with the acquisition of a foreign operation with a functional currency other than the Group's presentation currency (DKK) are treated as assets and liabilities belonging to the foreign entity and translated into the foreign operations functional currency at the exchange rate at the transaction date.

Acquisition or sale of equity interests without gaining or losing control of an entity is accounted for as equity transactions.

Significant judgements and accounting estimates

Brands and trademarks

The value of brands and trademarks acquired and their useful lives are based on the brands' and trademarks' market position, expected long-term developments in the relevant markets and profitability. Management determines the useful life for each brand and trademark based on its relative local, regional and global market strength, market share, and the current and planned marketing efforts that are helping to maintain and increase the value of the brand or trademark.

When the value of a well-established brand or trademark is expected to be maintained for an indefinite period in the relevant markets, and these markets are expected to be profitable for a long period, the useful life of the brand or trademark is determined to be indefinite.

The fair value of brands and trademarks is based on the relief from royalty method, under which the value is calculated from expected future cash flows for the brands and trademarks. Cash flows are based on key assumptions about expected useful life, royalty rate, growth rate and tax effects. A post-tax discount rate that reflects the risk-free interest rate with the addition of a risk premium associated with the particular brand is used to discount the expected future cash flows.

Customer relationships

Customer relationships are valued based on the multi-period excess earnings method. Cash flows related to the customer relationships are based on the forecasted revenues from existing customers, reduced by the expected future churn. Profits generated from those revenues are typically adjusted for saved selling costs, given that in most cases part of the selling costs relates solely to acquiring new customers. Profits are then netted of taxes and reduced by charges on contributory asset, which are required to generate those profits. Cash flows calculated in this way are discounted and adjusted for tax amortisation benefit.

Contingent consideration

Business combinations may include contingent considerations, e.g. when the Group acquires audiology chains or shops. Such contingent considerations are usually additional payments to the previous owners, when certain events occur or certain financial results are achieved. The measurement of contingent consideration at fair value at the transaction date inherently involve significant estimates. In making these estimates, Management e.g. considers sales run rates of the acquired business.

5.2 Remuneration of Key Management Personnel

1 October 2022 - 30 September 2023

DKKm	Short-term benefits	Termination benefits	Total
Board and Executive Management	9	-	9
Other Key Management	30	-	30
Total	39	-	39

1 October 2021 - 30 September 2022

DKKm	Short-term benefits	Termination benefits	Total
Board and Executive Management	11	-	11
Other Key management	35	1	36
Total	46	1	47

Other Key Management hold ordinary and preference shares in NH Lux ManCo SCSp. Please refer to Note 5.3 for details of this program. The shares held by the Executive Management and the Board of Directors are insignificant.

5.3 Management Participation Program Liability

The Group has in place a Management Participation Program ("MPP") - Certain members of Key Management Personal in WS Audiology A/S (the "MPP Participants") could acquire a partnership interest in NH Lux ManCo SCSp ("NHSCSp") from NorthHarbour Lux TopCo Sar ("TopCo"), a holding entity that is fully consolidated within WS Audiology, therefore indirectly having an ownership interest in the intermediate North Harbour Group.

The fair value of the equity instruments on acquisition date is equivalent to the cost. The redemption price is based on the leaver status at the time of redemption.

The MPP participants acquired Ordinary shares, which rank pari passu in all respects, as well as preference shares. The reacquisition of the ownership interests is triggered upon the termination of employment of MPP Participants; a liability in this regard is included in Other non-current liabilities, with reference to note 3.9.

MPP Liability	Number of shares (mil)
Outstanding at 1 October 2022	35
Additions	*
Disposals	(4)
Outstanding at 30 September 2023	31

MPP Liability	Number of shares (mil)
Outstanding at 1 October 2021	37
Additions	1
Disposals	(3)
Outstanding at 30 September 2022	35

The Fair value changes from the MPP recognized in the statement of profit and loss was DKK 50 million (2022: DKK 60 million)

Accounting policies

The accounting for the shares purchased by management (at fair value, represented by 'interests' in NHSCSp) as part of the North Harbour MPP scheme falls within the scope of IFRS 2 as a cash-based arrangement. A liability is recognised reflecting the fair value of the Group's intention to acquire the 'interests'.

Significant judgements and accounting estimates

The terms of the North Harbour MPP scheme include references to "good" and "bad" leavers, which impact the return to be received by MPP plan participants. The determination of the fair value of the liability under the MPP scheme is most significantly impacted by the estimation of good vs. bad leavers, and the determination of the fair value of the Group, and is consistent with the overall approach applied in the evaluation of Goodwill impairment testing as discussed in Note 3.3.

5.4 Pension obligations

Post-employment benefits provided by the Group are organized primarily through defined contribution plans as well as defined benefit plans which cover almost all of the Group's domestic employees and many of the Group's foreign employees. Post-employment defined benefit plans include to the major extent pension benefits.

Defined benefit plans

General principles are determined in a corporate pension policy. That means inter alia that the Group regularly reviews the design of its post-employment defined benefit plans. In order to reduce Group's exposure to certain risks associated with defined benefit plans, such as longevity, inflation, effects of compensation increase, the Group regularly review and continuously improves the design of its post-employment defined benefit plans. The benefits of the defined benefit plan open to new entrants are based predominantly on contributions made by the Group and are still affected by longevity, inflation adjustments and compensation increases, but only to a lesser extent. The major pension plans are funded with assets in segregated pension entities.

The existing defined benefit plans cover approximately as of 30 September 2023 - 3,795 participants, including 2,652 active employees, 707 former employees with vested rights and 436 retirees and surviving dependents (2022: 3,570 participants, including 2,457 active employees, 706 former employees with vested rights and 407 retirees and surviving dependents). Individual benefits are generally based on eligible compensation levels and/or ranking within the Group's hierarchy and years of service. The characteristics of the defined benefit plans and the risks associated with them vary depending on legal, fiscal and economic requirements in each country. For the major defined benefit plans of the Group the characteristics and risks are as follows:

Germany

In Germany, the Group provides pension benefits through the cash-balance plan BSAV (Beitragsorientierte Siemens Altersversorgung), frozen legacy plans and deferred compensation plans. Active employees in Germany participate in the BSAV introduced in fiscal 2004. A legacy pension plan (Altzusage) has been transformed into BSAV.

These benefits are predominantly based on contributions made by the Group and returns earned on such contributions, subject to a minimum return guaranteed. In general, the BSAV is fully funded from the Group's perspective. Sivantos GmbH has set up a CTA (Contractual Trust Arrangement) in order to take precautions of financing all of its BSAV pension obligations, including the Group. Individual benefits under the frozen legacy plans are based on eligible compensation levels or ranking within the Group's hierarchy and years of service. In connection with the implementation of the BSAV, benefits provided under the frozen legacy plans were modified to substantially eliminate the effects of compensation increases by freezing the accretion of benefits under the majority of these plans. However, these frozen plans still expose the Group to actuarial risks such as investment risk, interest rate risk and longevity risk. Furthermore, deferred compensation plans are offered which are funded via a CTA. In Germany no legal or regulatory minimum funding requirements apply. The Trust which is legally separate manages its plan assets as trustee in accordance with the respective trust agreements.

U.S.

The assets under these pension plans are administered by the Group and are, therefore, the sole responsibility of the Group. The assets are not separately identifiable; instead the companies had a common right to the trusts' assets. One major defined benefit plan, the Sivantos Pension Plan, is frozen to new entrants and accretion of new benefits. Employees hired prior to April 1, 2006 participate in the Sivantos Pension Plan. Most of the defined benefit plan participants' benefits are calculated using a cash balance formula; although a small group of participants are eligible for a benefit based on a final average pay formula. This frozen defined benefit plan exposes the Group to actuarial risks such as investment risk, interest rate risk and longevity risk.

The defined benefit plan assets are held in a Master Trust. The Group, as the sponsoring employer, has delegated investment oversight of the plans' assets to the Investment Committee. The Investment Committee members have a fiduciary duty to act solely in the best interests of the beneficiaries according to the trust agreement and U.S. law. The Committee has established an Investment Policy Statement which articulates the goals and objectives of the plans' investment management, including diversifying the assets of the Master Trust with the intention of appropriately addressing concentration risks. The trustee of the Master Trust acts only by direction of the Investment Committee. It is responsible for the safekeeping of the trust, but generally has no decision-making authority over the plan assets. The legal and regulatory framework for the plans is based on the applicable U.S. legislation Employee Retirement Income Security Act (ERISA). Based on this legislation a funding valuation is prepared annually. There is a regulatory requirement to maintain a minimum funding level of 80% in the defined benefit plans in order to avoid benefit restrictions.

The amounts included in the Group's Consolidated Statements of Financial Position arising from its pension obligations at 30 September are as follows:

DKKm	Defined benefit obligation	Fair value of plan assets	Total
30 September 2023			
Germany	(358)	395	37
U.S.	(231)	201	(30)

Actuarial assumptions

Assumed discount rates, compensation increase rates, pension progression rates and mortality rates used in calculating the DBO vary according to the economic and other conditions of the country in which the retirement plans are situated.

The mortality tables used for the actuarial valuation of the DBO were as follows (most significant countries):

Germany: Heubeck Richttafeln 2005G (modified)
U.S.: RP-2014 Employee and Healthy Annuitant Tables projected with Scale MP-2015 for all years

The DBO was only significantly affected by other financial assumptions in Germany and U.S. For Germany, the long-term rate of compensation increase and the pension increase rate were constant on average in fiscal year 2023 and 2022. For U.S., the DBO was mainly affected by the discount rate as the plan is frozen to new entrants and accretion of new benefits.

The DBO is also affected by assumed future inflation rates. The effect of inflation is recognized within the assumptions above where applicable.

The following were the principal actuarial assumptions at the reporting date (expressed as weighted averages).

	30 September 2023	30 September 2022
Germany		
Discount rate	4,08%	3,66%
Future salary growth	2,25%	2,25%
Expected return on assets	2,25%	2,25%
Expected pension progression	2,25%	2,25%
U.S.		
Discount rate	5,56%	5,08%
Future salary growth	N/A	N/A
Expected return on assets	5,56%	5,08%
Expected pension progression	3,00%	3,00%

Assumptions regarding future mortality have been based on published statistics and mortality tables. The current longevities underlying the values of the defined benefit obligation at the reporting date were as follows:

DKKm	30 September 2023	30 September 2022
Germany		
Longevity at age 55 for current pensioners		
Males	149	149
Females	179	179
Longevity at age 55 for current pensioners with 10% reduction in mortality rates		
Males	156	156
Females	186	186
U.S.		
Longevity at age 55 for current pensioners		
Males	214	214
Females	233	233
Longevity at age 55 for current pensioners with 10% reduction in mortality rates		
Males	222	222
Females	239	239

The weighted-average duration of the defined benefit obligation was 9,4 years as at 30 September 2023 (2022: 9,7 years).

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumption shown.

Sensitivity analysis

As the significant part of the DBO results from the German and U.S. entities, the sensitivity analysis was as follows:

30 September 2023

DKKm	0.5% increase	0.5% decrease
Germany		
Discount rate	(14)	14
Rate of pension progression	7	(7)
	-1 year	+1 year
Life expectancy	(7)	7

U.S	0.5% increase	0.5% decrease
Discount rate	(7)	7

30 September 2022

DKKm	0.5% increase	0.5% decrease
Germany		
Discount rate	(14)	16
Rate of pension progression	10	9
	-1 year	+1 year
Life expectancy	(7)	7

U.S	0.5% increase	0.5% decrease
Discount rate	(10)	10

The Company expects to pay DKK 52 million (2022: DKK 57 million) in contribution to its defined benefit plans in the upcoming financial year.

Defined contribution plans

The amount recognized as an expense for defined contribution plans at 30 September 2023 was DKK 104 million (2022: DKK 87 million).

Accounting policies

Defined contribution plans

The Group operates a number of defined contribution plans around the World. These plans are externally funded in entities, e.g. insurance entities, that are legally separate from the Group. Contributions to defined contribution plans are recognised in the income statement in the year to which they relate.

Defined benefit plans

The Group also operates defined benefit plans in a few jurisdictions, primarily in Germany and the USA.

The liability and costs for the year for defined benefit plans are determined using the projected unit credit method. This reflects services rendered by employees to the valuation dates and is based on actuarial assumptions regarding future compensation and benefit increases, mortality, expected return on plan assets and discount rates. Discount rates are based on average market yields of high quality corporate bonds in the country and/or currency in which the pension liabilities are expected to be settled.

Current service cost, past service cost and settlements for post-employment benefits as well as other administration costs which are un-related to the management of plan assets are recognised in the income statement and allocated among functional costs, following the functional area of the corresponding profit and cost centre. Administration costs which are related to the management of plan assets and taxes directly linked to the return on plan assets and payable by the plan itself are included in the return on plan assets and are recognised in other comprehensive income.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in Other comprehensive income in the period in which they arise. Past service costs are recognised immediately in the income statement.

For unfunded plans, the Group recognises a post-employment liability as non-current liability. For funded plans, the Group offsets the fair value of plan assets with the benefit obligations, and recognises the net amount, after adjustments for effects related to any asset ceiling, as a non-current liability or other current assets.

5.5 Contingent liabilities and securities

Guarantees

The Group has issued Corporate Guarantees, mainly to the business partners, outstanding for an amount of DKK 611 million at 30 September 2023 (2022: DKK 812 million). None of the outstanding guarantees are likely to be drawn, hence no provisions have been made.

In addition, the Group has a contingent obligation to indemnify the issuing Banks for Bankers Guarantees for an amount of up to DKK 112 million (2022: DKK 75 million) at 30 September 2023. None of the outstanding guarantees are likely to be drawn, hence no provisions have been made.

Outstanding lawsuits and disputes

The Group is, from time to time, subject to legal disputes in connection with its business activities. In the light of the number of legal disputes and proceedings in which the Group is involved, it cannot be ruled out that some of these proceedings could result in rulings against the Group. Although the Group maintains liability insurance in its non-amounts the Group considers consistent with industry practice, it may not be fully insured against all potential damages that may arise out of any claims to which the Group may be party in the ordinary course of the Group's business. At this time, however the Group does not expect any significant negative effects on the Group's financial position or finance and earnings situation resulting from legal disputes.

The Group seeks to make adequate provisions for any legal disputes and proceedings, and assesses the likely outcome in which the Group is involved.

5.6 Associates

DKKm	Investments in associated	Receivables from associates
Cost at 1 October 2022	290	39
Share of post acquisition retained earnings	(17)	-
Carrying amount at 30 September 2023	273	39

DKKm	Investments in associated	Receivables from associates
Cost at 1 October 2021	208	39
Share of post acquisition retained earnings	82	-
Carrying amount at 30 September 2022	290	39

Included in the investments in associates is a customer loan to an associate, Hear-Mart Holdings LLC, of DKK 15 million. The investment was fully impaired fully in 2019/20 as Management has assessed that there are difficulties in recovering the loan.

The Group's investments in associates are not individually material.

Please refer to Note 5.10 for a list of associates.

Accounting policies

Associates are those entities in which the Group has significant influence but not control or joint control over the financial and operating policies. A joint venture is an arrangement in which the Group has joint control over the financial and operating policies, and where the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Investments in associates and joint ventures are accounted for using the equity method. This entails that the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture calculated in accordance with the Group's accounting policies. When the Group's share of losses of an associate or joint venture exceeds the Group's interest in such associate or joint venture, the Group discontinues recognising its share of future losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

5.7 Non cash adjustments

DKKm	1 October 2022 - 30 September 2023	1 October 2021 - 30 September 2022
Unrealised loss of loans and borrowings	(700)	1.688,1
Others	45	58,0
Total	(655)	1.746,1

Significant non-cash transaction – for the period 1 October 2022– 30 September 2023

For the financial year ended 30 September 2023, there were no significant non-cash transaction.

5.8 Fees to auditors appointed at the annual general meeting

1 October 2022 – 30 September 2023

DKKm	Deloitte	Others
Audit fees	15	7
Other assurance related services	*	*
Tax services	7	7

Tax services	-	15
Other services	-	-
Total	14	30

5.9 Related parties

Related parties include group entities controlled by T&W Medical A/S as well as associates.

Transactions with related parties

In addition to the related party disclosure that is disclosed elsewhere in the financial statements, the following significant transactions between the Group and its related parties took place at terms agreed during the fiscal year.

DKKm	1 October 2022 – 30 September 2023	1 October 2021 – 30 September 2022
Transactions with shareholders		
- Loans from related parties	(1.526)	(1.454)
- Repayment of loans to related parties	115	163
- Interest on loans	(38)	(26)
Transactions with associates		
- Sales of goods and services	-	3
Other related parties		
- Purchase of goods and services	(60)	(57)

As at 30 September 2023, the outstanding balances with the associated are DKK 47 million (30 September 2022: DKK 42 million).

Transactions with related individuals

The Group's Executive management is defined as those persons, who are responsible for the Group's worldwide operating business, based on their function within the Group or the interests of WS Audiology A/S and registered directors in the parent company. In financial years 2021/22 and 2020/21, there were no significant, material or major transactions between the Group and members of the Executive Management and the Board of Directors, other than their remuneration and transactions towards the participation program. For information about remuneration to Executive management and Board of Directors refer to Note 5.2.

1 Basis of preparation

The parent financial statements for T&W Medical A/S have been prepared in accordance with IFRS as adopted by the European Union (EU) and further requirements in the Danish Financial Statements Act.

The parent financial statements are presented in Danish Krone (DKK) which is the functional currency of T&W Medical A/S. All values are rounded to the nearest million (DKK) with one decimal, except where indicated otherwise.

The Parent's general accounting policies are described in each of the individual notes to the parent financial statements. The accounting policies set out below and in each note have been used consistently in respect of the financial year and the comparative figures.

The financial statements for all periods presented have been prepared in accordance with all IFRS as adopted by EU effective for accounting periods ending 30 September 2023.

2 Result of the year

2.1 Tax

DKKm	1 October 2022 – 30 September 2023	1 October 2021 – 30 September 2022
Tax on profit/(loss)		
Current tax for the year	41	37
Deferred tax for the year	-	(1)
Total	41	36

Reconciliation of effective tax rate	1 October 2022 – 30 September 2023	1 October 2021 – 30 September 2022
Danish tax rate	22%	22%
Expected income tax (expense)/benefit	72	284
Non-taxable items	(31)	(248)
Adjustment of tax with respect to prior year		
Total	41	36

T&W Medical A/S serves as the administration company in a Danish joint taxation arrangement with all subsidiaries. According to the joint taxation provisions of the Danish Corporation Tax Act, the Entity is therefore liable for income taxes etc for the jointly taxed entities and for obligations, if any, relating to the withholding of tax on interest, royalties and dividend for these entities.

3 Operating assets and liabilities

3.1 Property, plant and equipment

DKKm	30 September 2023
Cost beginning of year	2
Additions	-
Cost end of year	-
Amortisations and depreciation beginning of year	-
Depreciation	(1)
Amortisations and depreciation end of year	(1)
Carrying amount end of year	1

Accounting policies

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost comprises the purchase price and costs directly attributable to bringing the asset to its location and condition necessary for its intended use. In addition, the initial estimate of the costs related to dismantling and removing the asset and restoring the site on which the asset is located are added to the cost, if relevant. Where individual components of an item of property, plant and equipment, that is material, have different useful lives, they are accounted for as separate items, and depreciated separately. Borrowing costs are included in the cost for assets that necessarily take a substantial period of time to get ready for the intended use.

Depreciation is recognised on a straight-line basis over the expected useful lives of property, plant and equipment, taking into account the expected residual value after the end of the useful life. The expected useful lives are as follows:

The estimated useful lives are as follows:

- Other fixtures and fittings, tools and equipment, furniture etc. 5-8 years

Estimated useful lives and residual values are reassessed annually. If the residual value exceeds the carrying amount, depreciation is discontinued. When changing the expected useful lives or the expected residual value, the effect on the depreciation is recognised prospectively as a change in accounting estimates.

Depreciation is recognised in the income statement as production costs, development costs, distribution costs and administrative expenses.

3.2 Investment in subsidiaries

DKKm	30 September 2023	30 September 2022
Cost beginning of year	6.022	5.714
Additions	3.428	203
Additions from business combination	-	105
Transfers	-	-
Cost end of year	9.450	6.022
Revaluations beginning of year	1.988	2.520
Share of profit/loss for the year	(97)	(1.108)
Addition from business combination	-	(75)
Share of other comprehensive income, net	(321)	713
Share of other transactions	53	(37)
Dividend	(25)	(25)
Revaluations end of year	1.598	1.988
Carrying amount end of year	11.048	8.010

Group companies are listed on Note 5.10 of the Group financial statements. As set out in Note 1 to the Consolidated financial statements, the investment in subsidiary represents a significant non-cash transaction.

Accounting policies

Investments in subsidiaries are recognized and measured under the equity method. This means that investments are measured at the pro rate share of the enterprises equity plus or less unamortized positive, or negative, goodwill and plus or less unrealized intra-group profits or losses.

The Parent's share of the enterprises' profits or losses after elimination of unrealized intra-group profits and losses and less or plus amortization of positive, or negative, goodwill is recognized in the income statement.

Subsidiaries with negative equity value are measured at zero value, and any receivables from these enterprises are written down by the Parent's share of such negative equity if it is deemed irrecoverable. If the negative equity exceeds the amount receivable, the remaining amount is recognized under provisions if the Parent has a legal or constructive obligation to cover the liabilities of relevant enterprises.

Upon distribution of profit or loss, net revaluation of investments in subsidiaries is transferred to reserve for net revaluation according to the equity method under equity.

3.3 Investment in associates

DKKm	30 September 2023	30 September 2022
Cost beginning of year	67	-
Additions	5	67
Transfer	(45)	-
Cost end of year	27	67
Revaluations beginning of year	(20)	-
Impairment losses	(4)	(20)
Depreciation for the year, goodwill	(18)	-
Dividend	(2)	-
Transfer	43	(20)
Revaluations end of year	(1)	(20)
Carrying amount end of year	26	47

Accounting policies

Associates are those entities in which the Group has significant influence but not control or joint control over the financial and operating policies. A joint venture is an arrangement in which the Group has joint control over the financial and operating policies, and where the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Investments in associates and joint ventures are accounted for using the equity method. This entails that the investments are initially recognised at cost and adjusted thereafter to recognise the Parent's share of the profit or loss and other comprehensive income of the associate calculated in accordance with the Parent's accounting policies. When the Parent's share of losses of an associate exceeds the Parent's interest in such associate, the Group discontinues recognising its share of future losses. Additional losses are recognised only to the extent that the Parent has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

3.4 Other non-current and current assets

DKKm	30 September 2023	30 September 2022
Other non-current financial assets		
Other loans	1.431	1.358
Intragroup loans	553	550
Securities and other equity investments	154	115
Total	2.138	2.023
Other current financial assets		
Others	0	0
Total	0	0

Other loans are loans issued to non-controlling interests in WS Audiology for the purpose of such non-controlling interests acquisition of shares in Auris Lux II S.A., which was ultimately exchanged for shares in WS Audiology. The loans become due at 28 February 2025, at which date T&W Medical may at its election require that the repayment of the loans be satisfied in full through the transfer of shares in WS Audiology from the borrower to T&W Medical. No fair value adjustments are recognized in 2022/23.

Intragroup loans are loans to subsidiaries of WS Audiology A/S. Credit risk related to the loans is insignificant.

Accounting policies

Issued loans with conversion options are measured in their entirety at fair value through profit or loss. Fair value is determined using discounted cash flows based on forward rate curve (level 2).

Other loans and receivables, including intragroup loans are recognized initially at fair value less directly attributable transactions costs. Subsequently, they are measured at amortised cost using the effective interest method less impairment. A loss allowance is recognized at initial recognition and subsequently based on 12-months expected credit losses, unless a significant increase has arisen since the initial recognition of the loans and receivables, in which case the loss allowance is based on lifetime expected credit losses.

3.5 Short- and long-term debts

DKKm	Less than 1 year	Between 1-5 years	More than 5 years	Total
30 September 2023				
Interest-bearing debt	294	2.040	-	2.334
Trade payables	4	-	-	4
Other financial liabilities	9	3	-	12
Total non-derivative financial liabilities	307	2.043	-	2.350

DKKm	Less than 1 year	Between 1-5 years	More than 5 years	Total
30 September 2022				
Interest-bearing debt	139	1.640	-	1.779
Trade payables	2	-	-	2
Other financial liabilities	239	6	-	245
Total non-derivative financial liabilities	380	1.646	-	2.026

The risk implied from the values in the table above reflects the one-sided scenario of cash outflows only. Obligations under trade payables and other financial liabilities mainly originate from the financing of assets ongoing operations such as investments in working capital and trade receivables.

4 Other disclosures

4.1 Outstanding shares

For more information regarding outstanding shares, please refer to Note 4.1 in the consolidated financial statements.

4.2 Related parties

T&W Medical A/S is the parent entity and ultimate parent controlling WS Audiology A/S.

DKKm	1 October 2021 - 30 September 2023	1 October 2020 - 30 September 2022
Transactions with related parties		
- Intergroup loans, granted	553	550
- Loans, received	4.027	3.443
- Receivables, intergroup	224	12
- Interest on loans, paid	218	226
- Interest on loans, received	54	47

4.3 Business Combinations Accounting policies

The Entity has been established through the contribution of an existing company. The uniting-of-interests method has been applied in drawing up the opening balance sheet in which the uniting of interests is considered completed at the time of formation on 01.10.2021 without restatement of comparative figures (the book value method). When the opening balance sheet is drawn up applying the uniting-of-interests method, the assets and liabilities of the contributed company are recognised at carrying amounts based on the Entity's accounting policies. Any difference between the consideration agreed and the carrying amount of the net assets contributed is recognised in equity.

4.4 Significant events after the balance sheet date

There have been no non-adjusting events after the balance sheet date that would be expected to influence the economic decisions that users make on the basis of these financial statements.

4.5 Approval of the consolidated financial statements

The financial statements of T&W Medical A/S were approved by the Board of Directors and authorised for issue on 8 March 2024.

Statement by Management on the Annual Report

The Board of Directors and the Executive Management have today considered and approved the Annual Report of T&W Medical A/S for the financial year October 1, 2022 to September 30, 2023.

The Annual Report is presented in accordance with the IFRS Accounting Standards, which have been adopted by the EU and disclosure requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's assets, liabilities and financial position at September 30, 2022 and of their financial performance and cash flows for the financial year October 1, 2022 to September 30, 2023.

We also find that the Management commentary provides a fair statement of developments in the activities and financial situation of the Group and the Parent, financial results for the period, the general financial position of the Group and the Parent, and a description of conditions referred to therein.

We recommend that the Annual Report be approved at the Annual General Meeting.

Independent auditors' report

To the shareholders of T&W Medical A/S

Opinion

We have audited the consolidated financial statements and the parent financial statements of T&W Medical A/S for the financial year October 1, 2022 to September 30, 2023, which comprise the income statement, statement of comprehensive income, balance sheet, statement of cash flow, statement of changes in equity and notes, including a summary of significant accounting policies, for the Group as well as the Parent. The consolidated financial statements and the parent financial statements are prepared in accordance with IFRS Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's financial position at 30 September 2023, and of the results of their operations and cash flows for the financial year October 1, 2022 to September 30, 2023 in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements and the parent financial statements* section of this auditor's report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on the management commentary

Management is responsible for the management commentary.

Our opinion on the consolidated financial statements and the parent financial statements does not cover the management commentary, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements and the parent financial statements, our responsibility is to read the management commentary and, in doing so, consider whether the management commentary is materially inconsistent with the consolidated financial statements and the parent financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the management commentary provides the information required by relevant law and regulations.

Based on the work we have performed, we conclude that the management commentary is in accordance with the consolidated financial statements and the parent financial statements and has been prepared in accordance with the requirements by relevant law and regulations. We did not identify any material misstatement of the management commentary.

Management's responsibilities for the consolidated financial statements and the parent financial statements

Management is responsible for the preparation of consolidated financial statements and parent financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements and parent financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements and the parent financial statements, Management is responsible for assessing the Group's and the Parent's ability to continue as a going concern, for disclosing, as applicable, matters related to going concern, and for using the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements unless Management either intends to liquidate the Group or the Entity or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements and the parent financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements and the parent financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and these parent financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and the parent financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements and the parent financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements and the parent financial statements, including the disclosures in the notes, and whether the consolidated financial statements and the parent financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
